For layout purposes, here are the primary dividing lines used for centering.

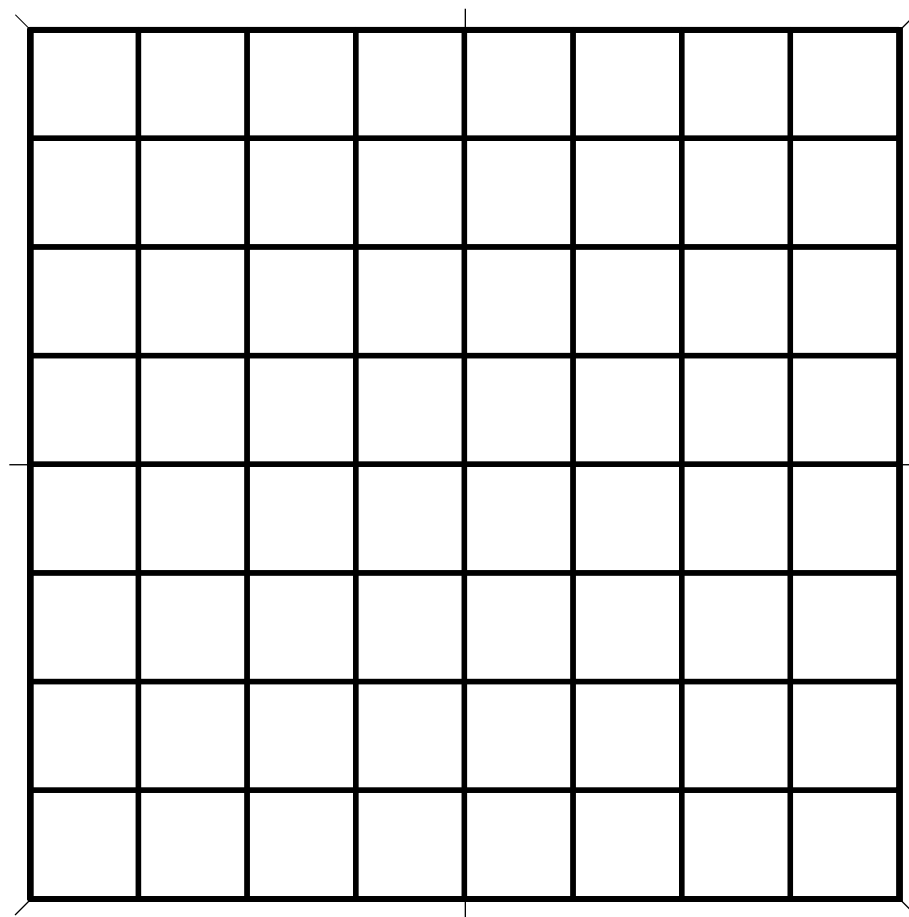

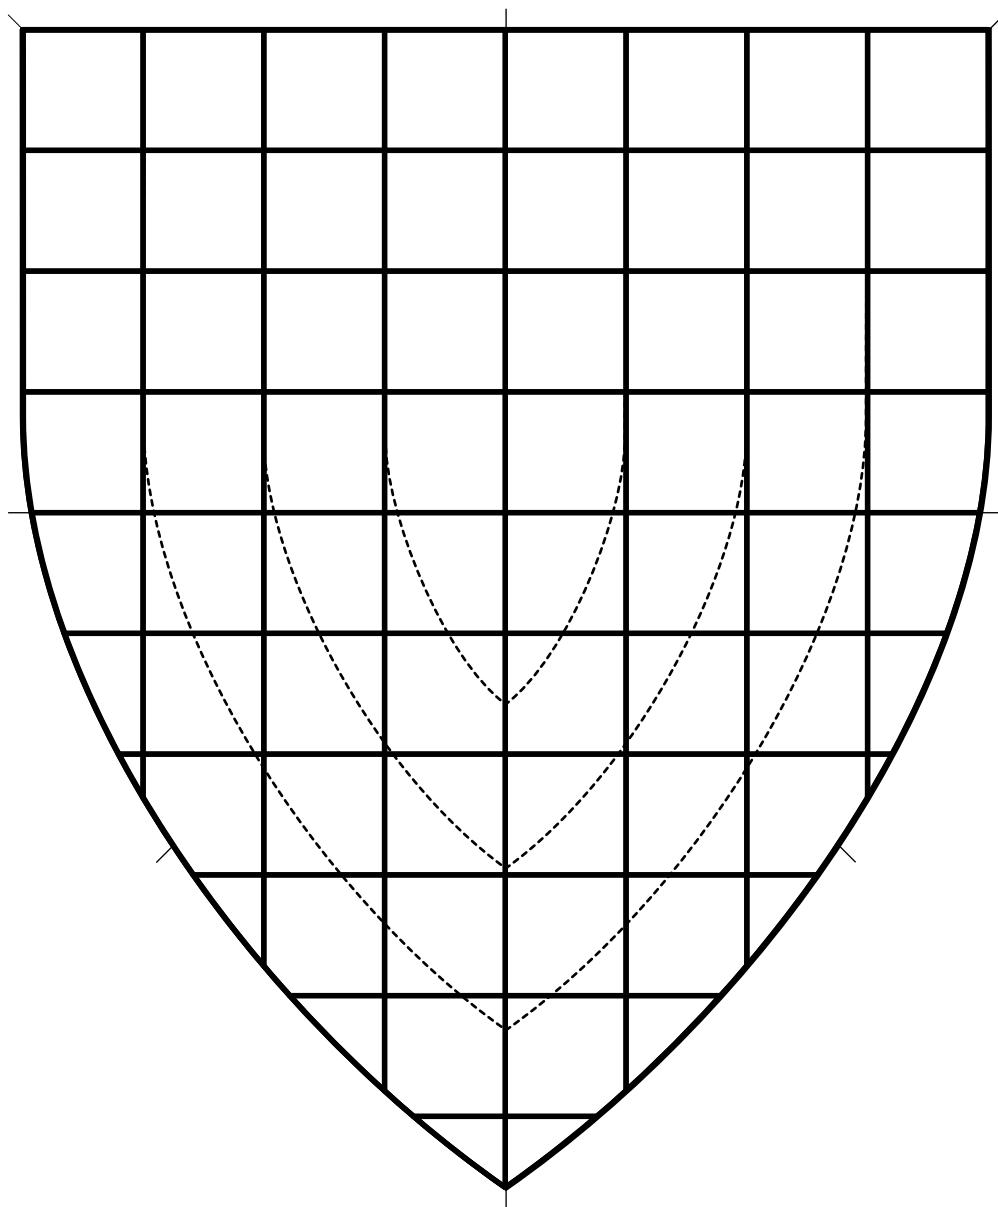

For layout purposes, here are the primary dividing lines and some common borders of ordinaries.

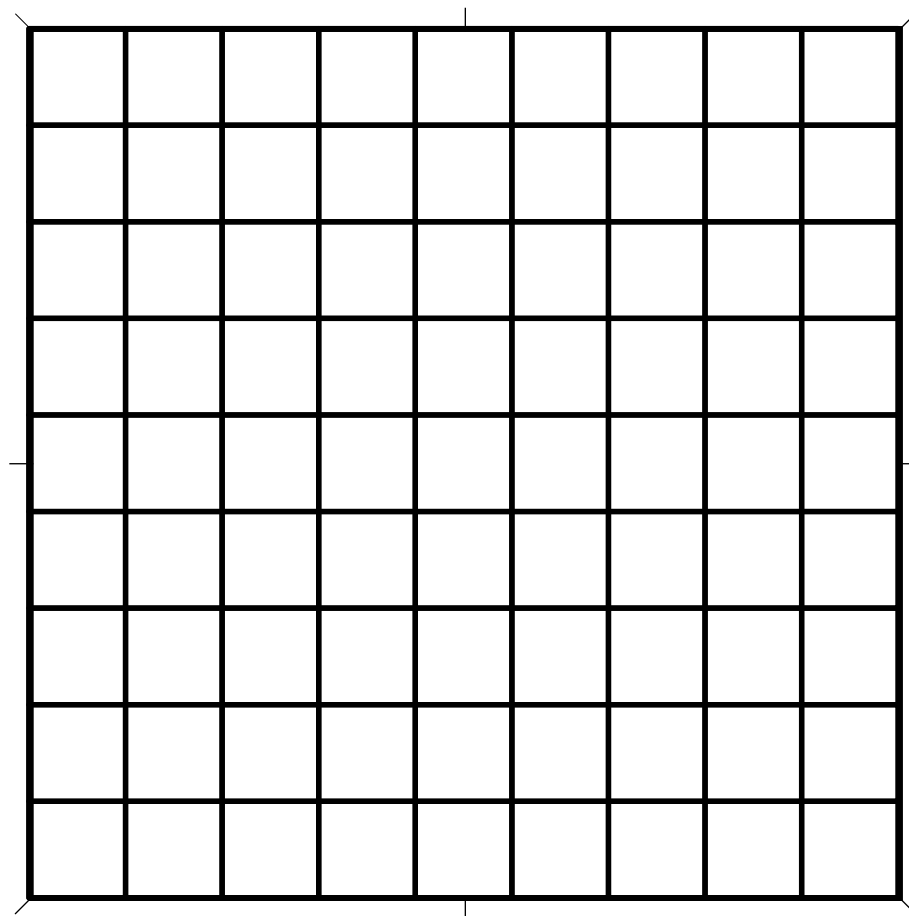

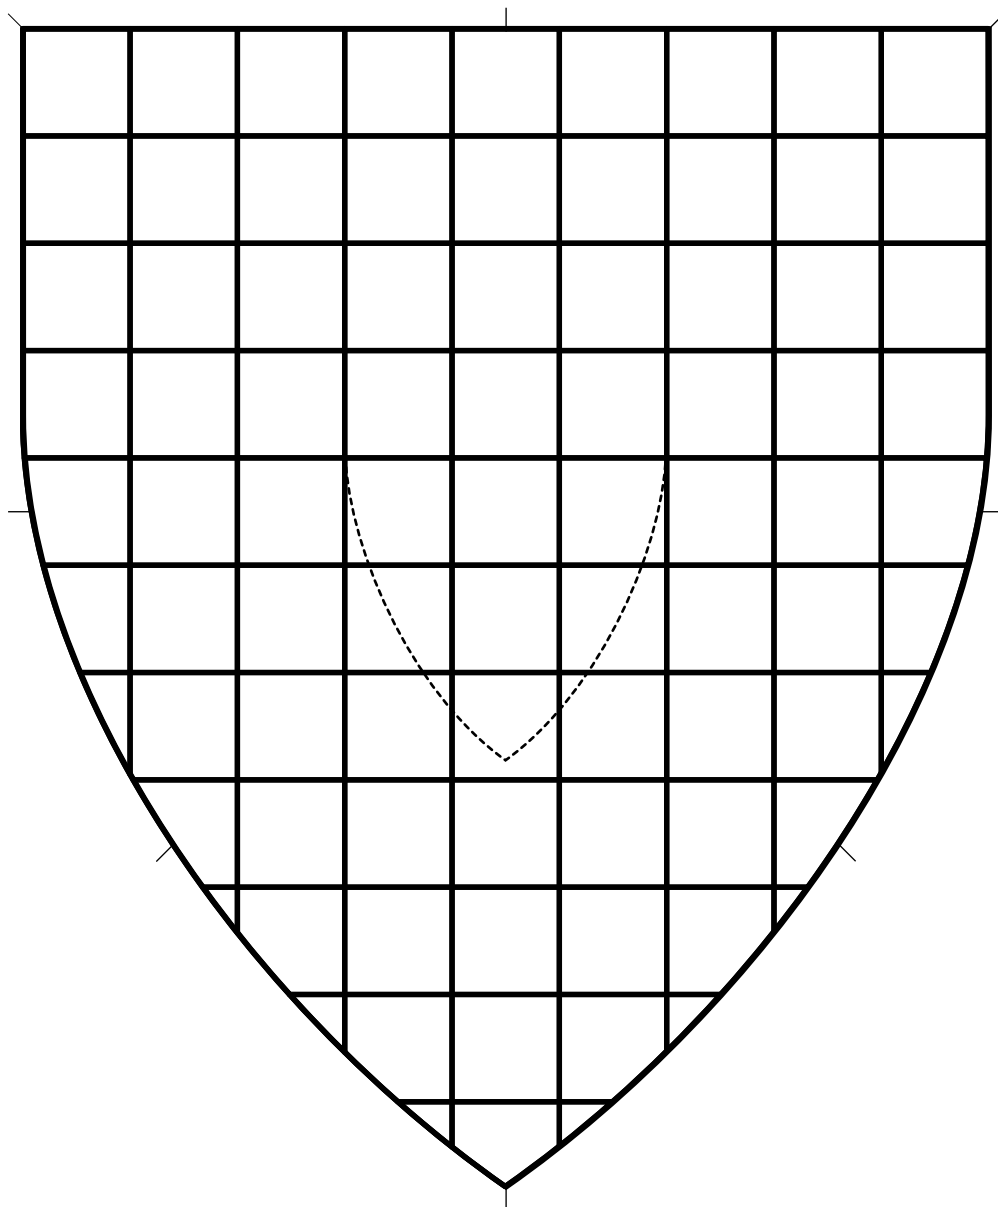

For layout purposes, the field here is divided into squares one sixth of its width.

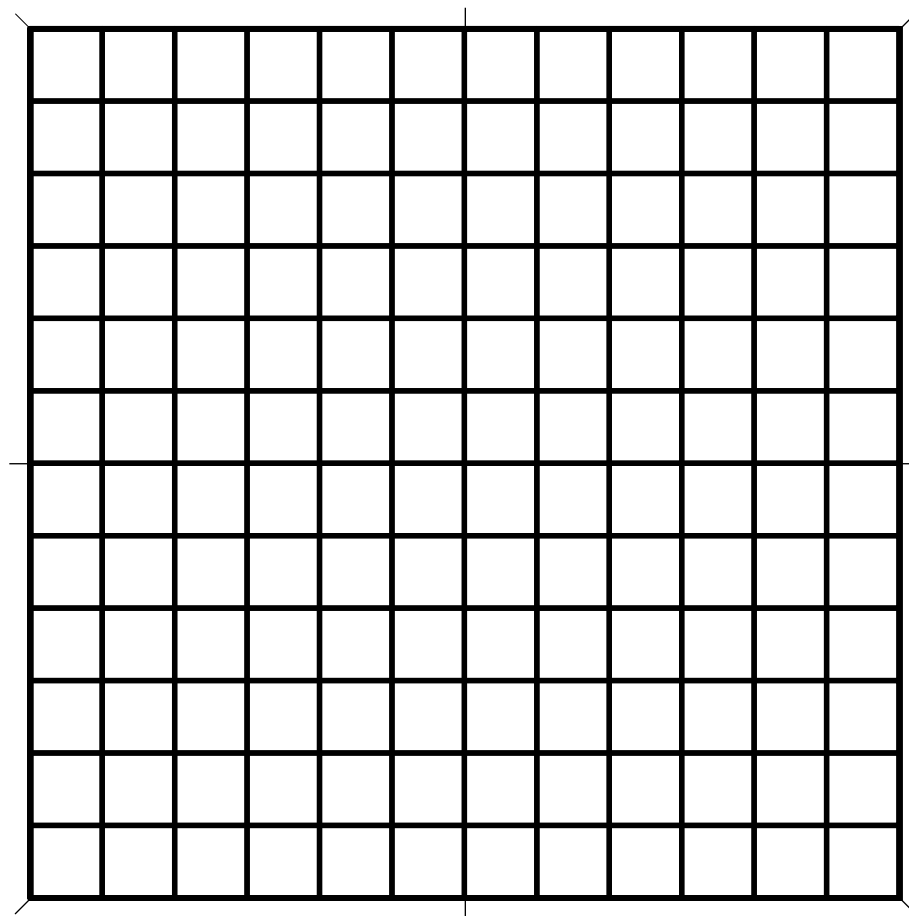

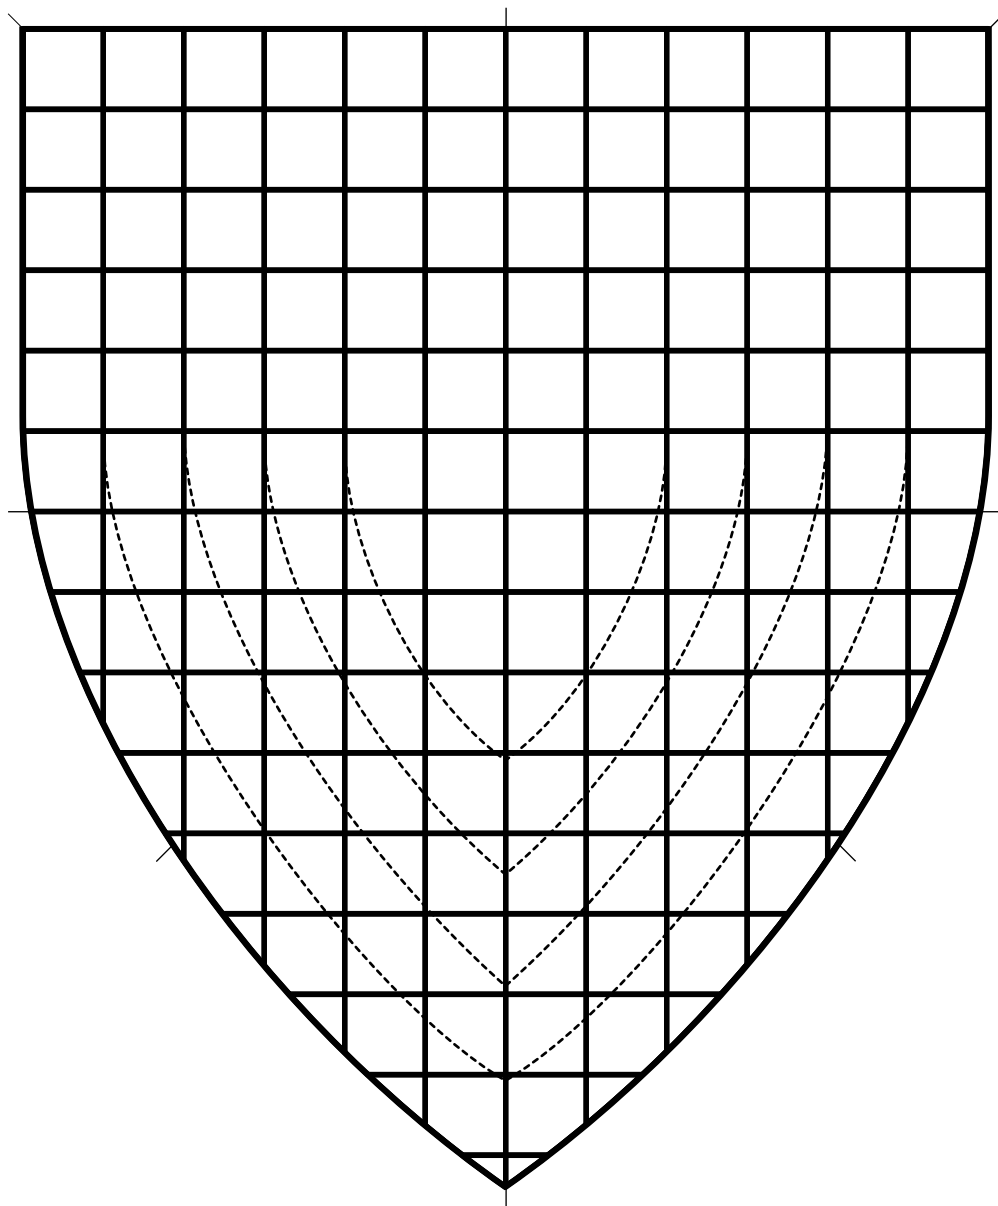

Grid of 6  6.5

For layout purposes, the field here is divided into squares one eighth of its width.

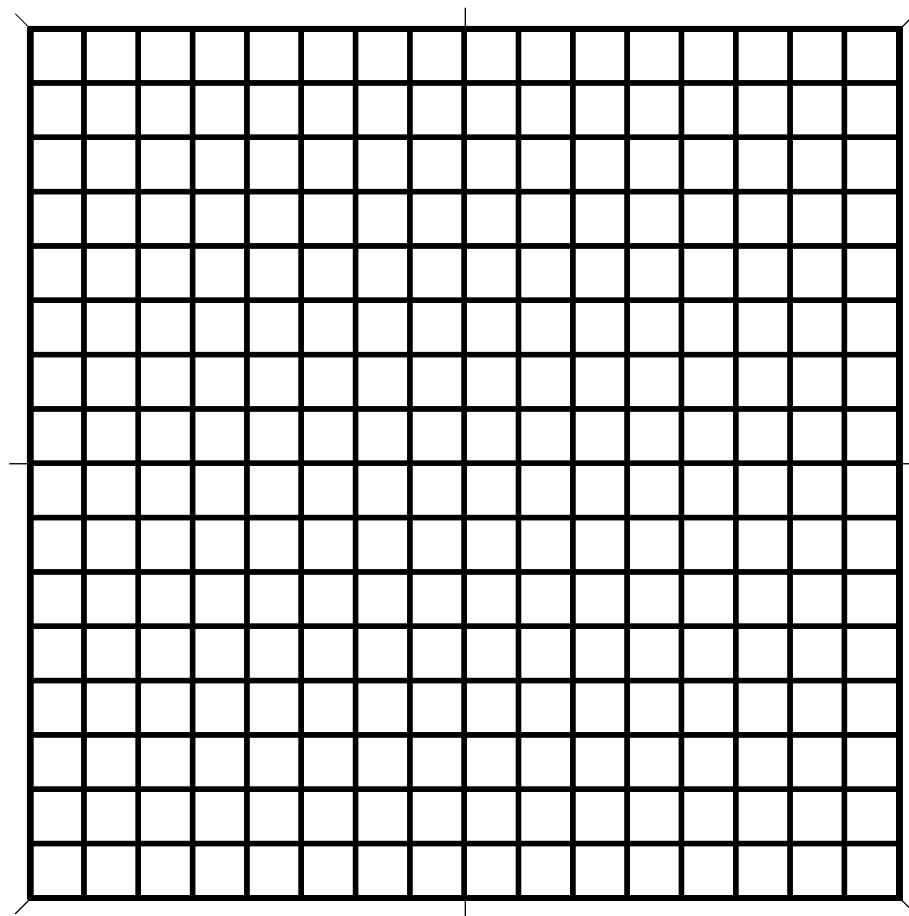

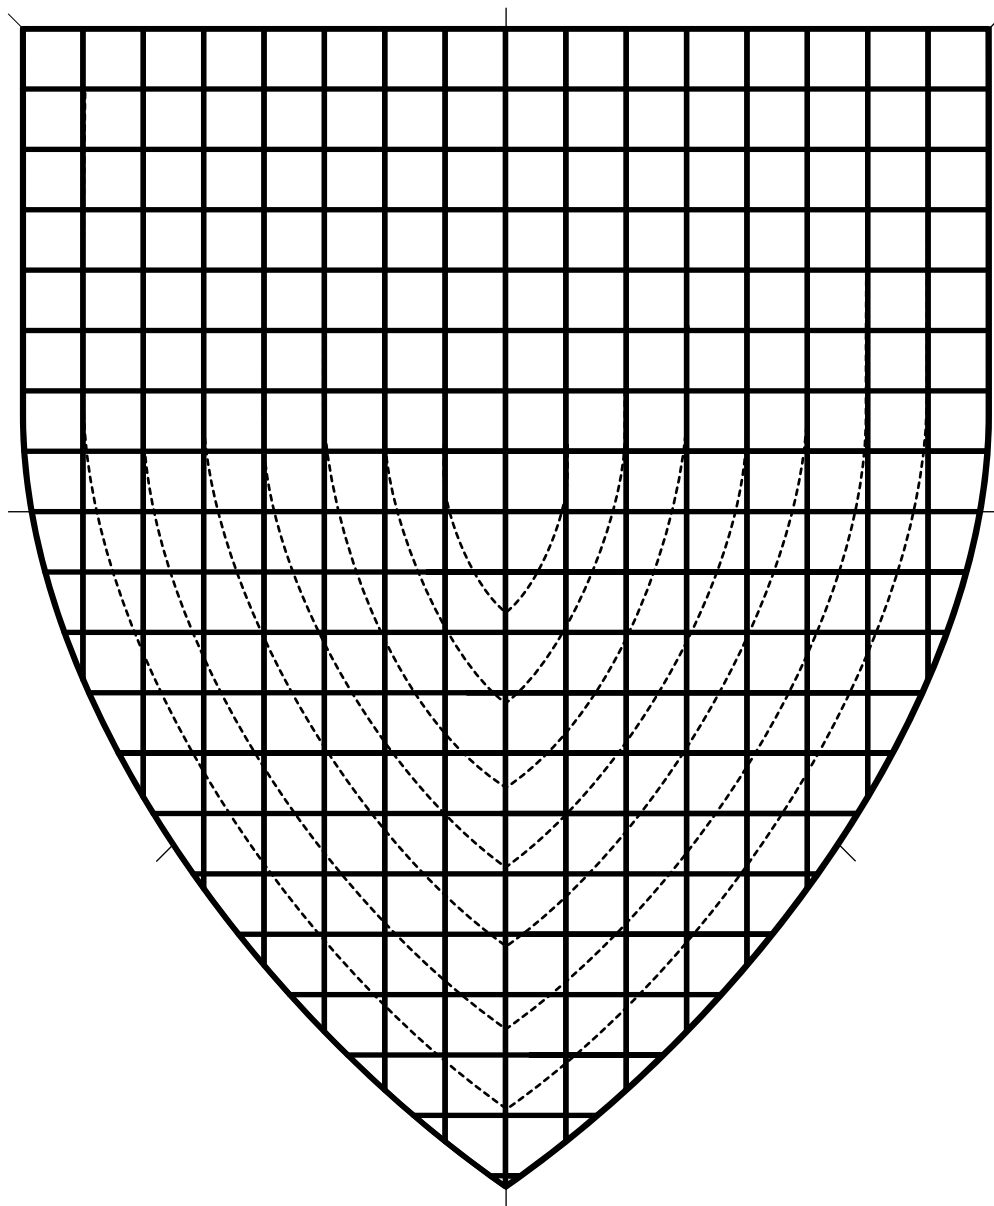

For layout purposes, the field here is divided into squares one ninth of its width.

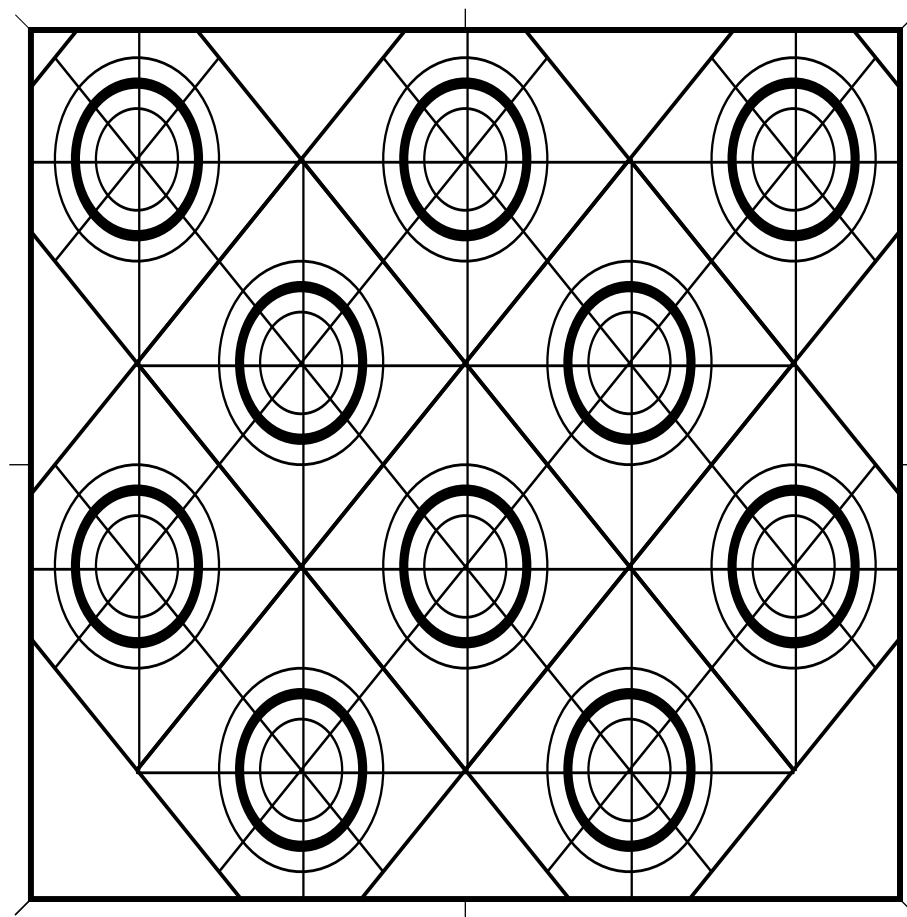

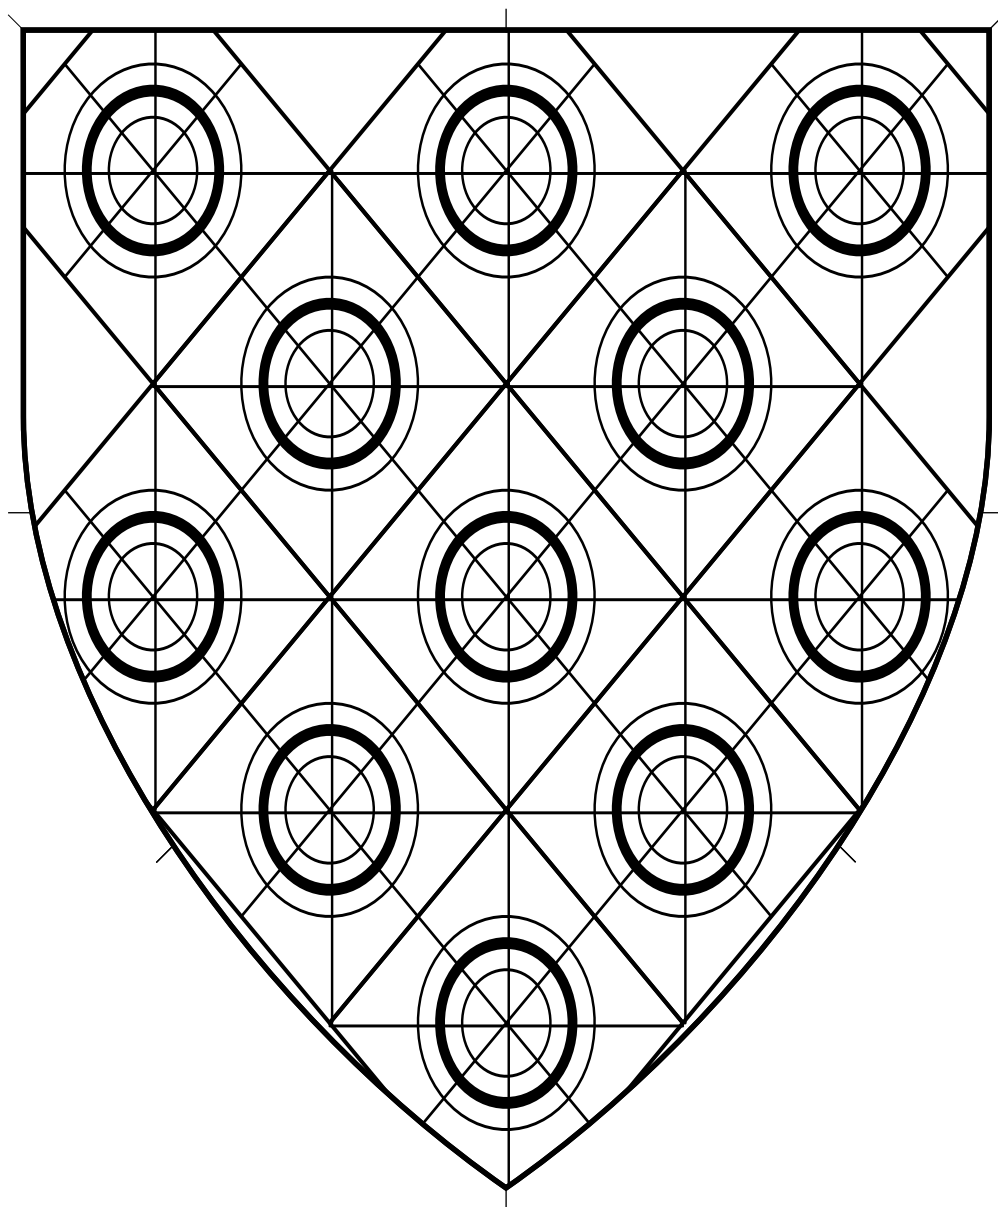

For layout purposes, the field here is divided into squares one twelfth of its width.

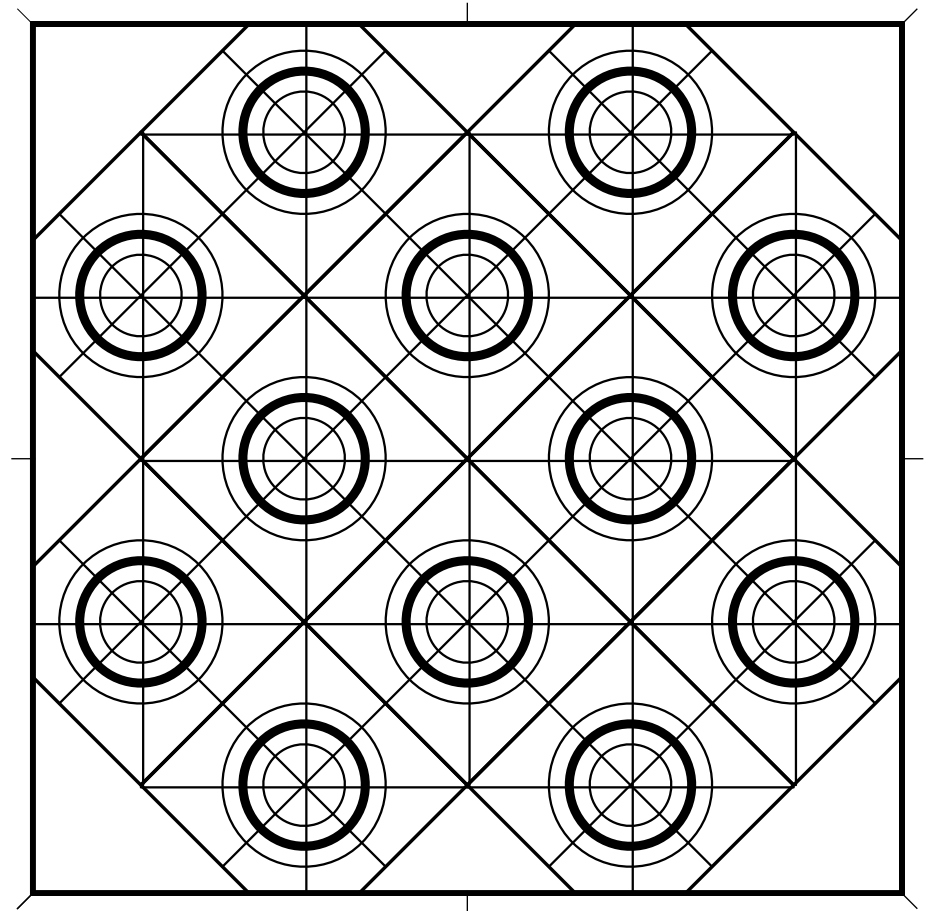

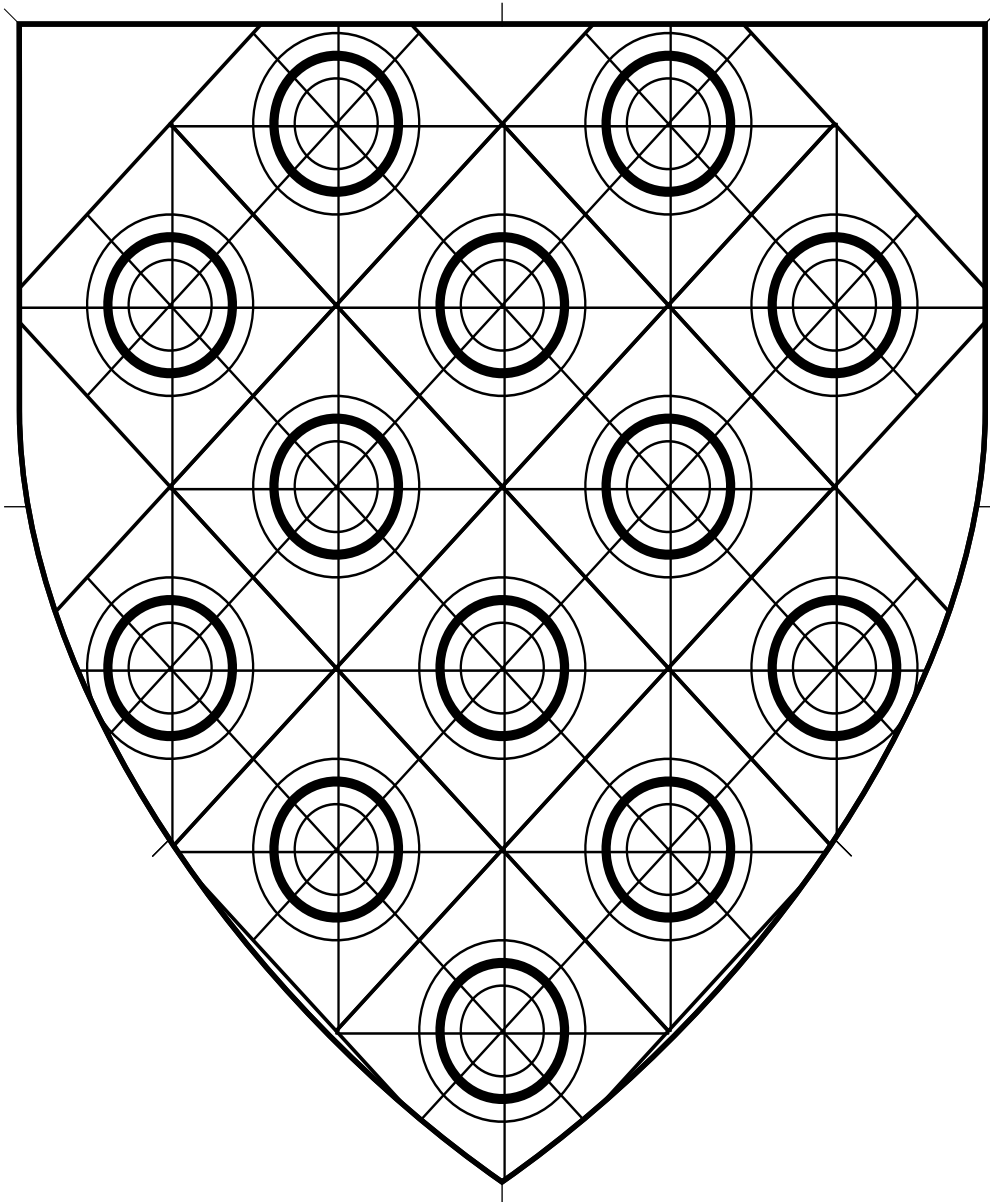

For layout purposes, the field here is divided into squares one sixteenth of its width.

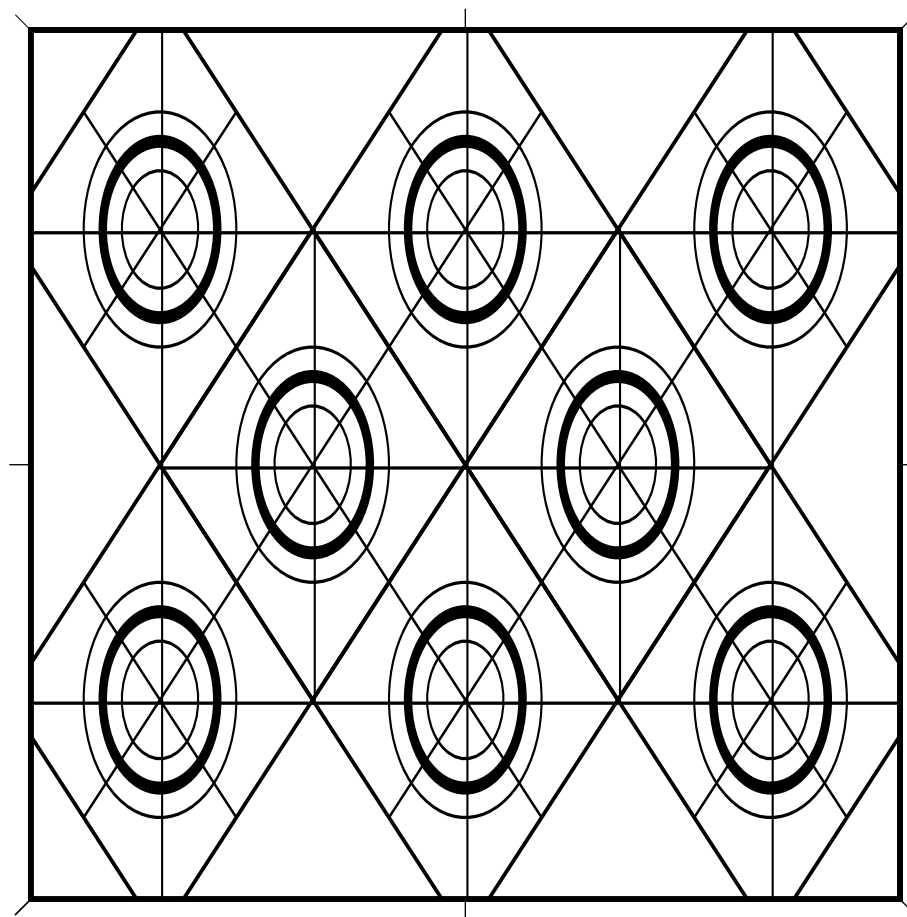

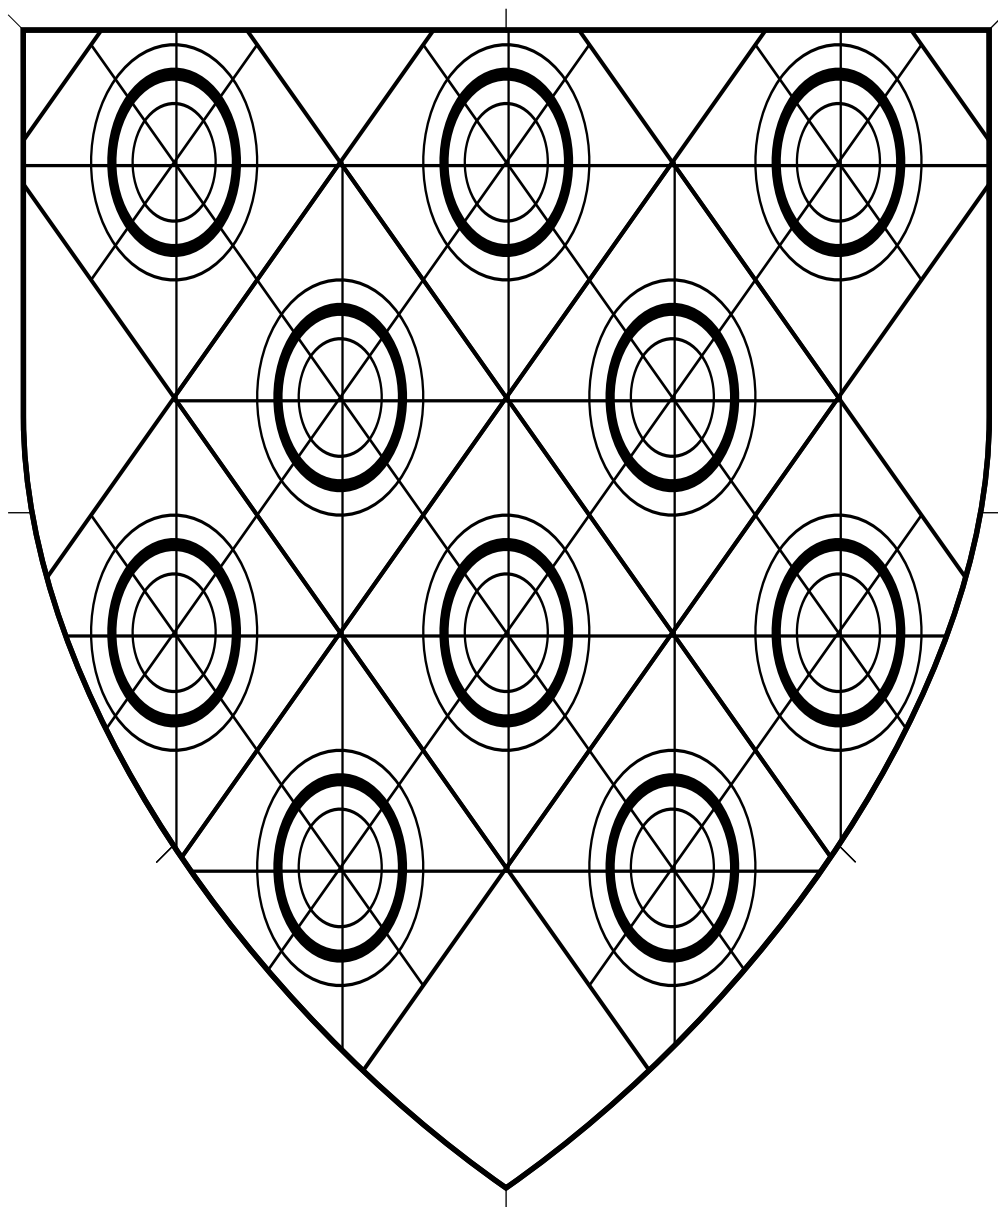

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

**Semy of 5x4 • G.10**

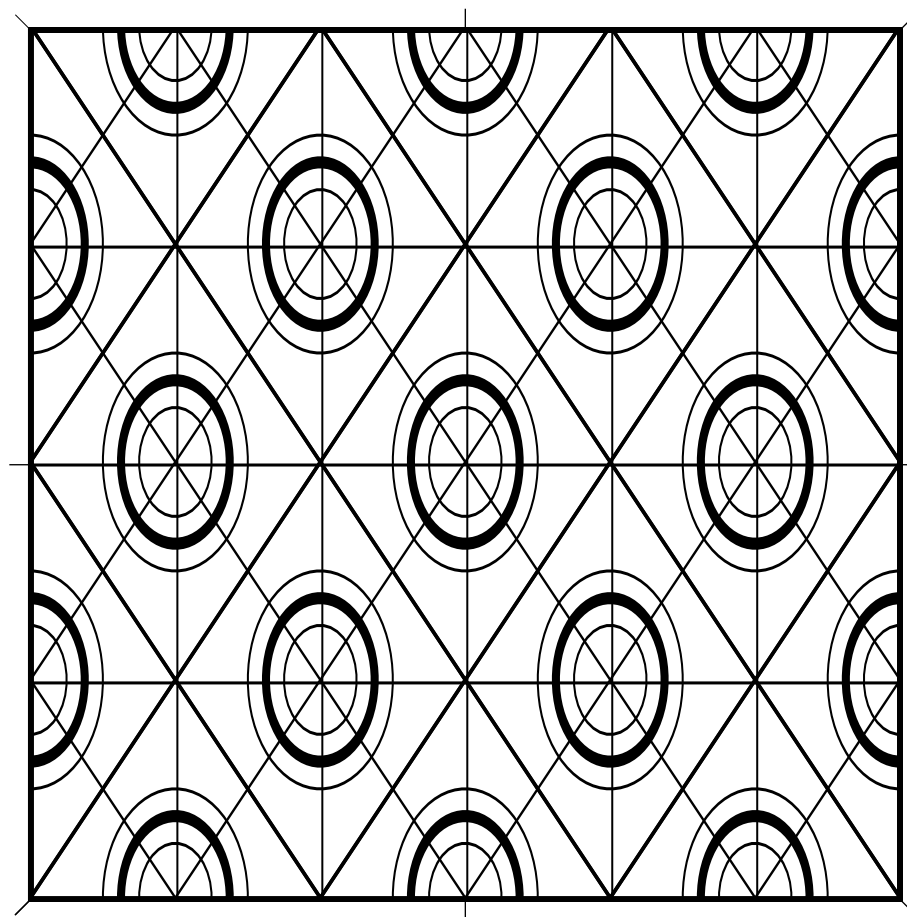

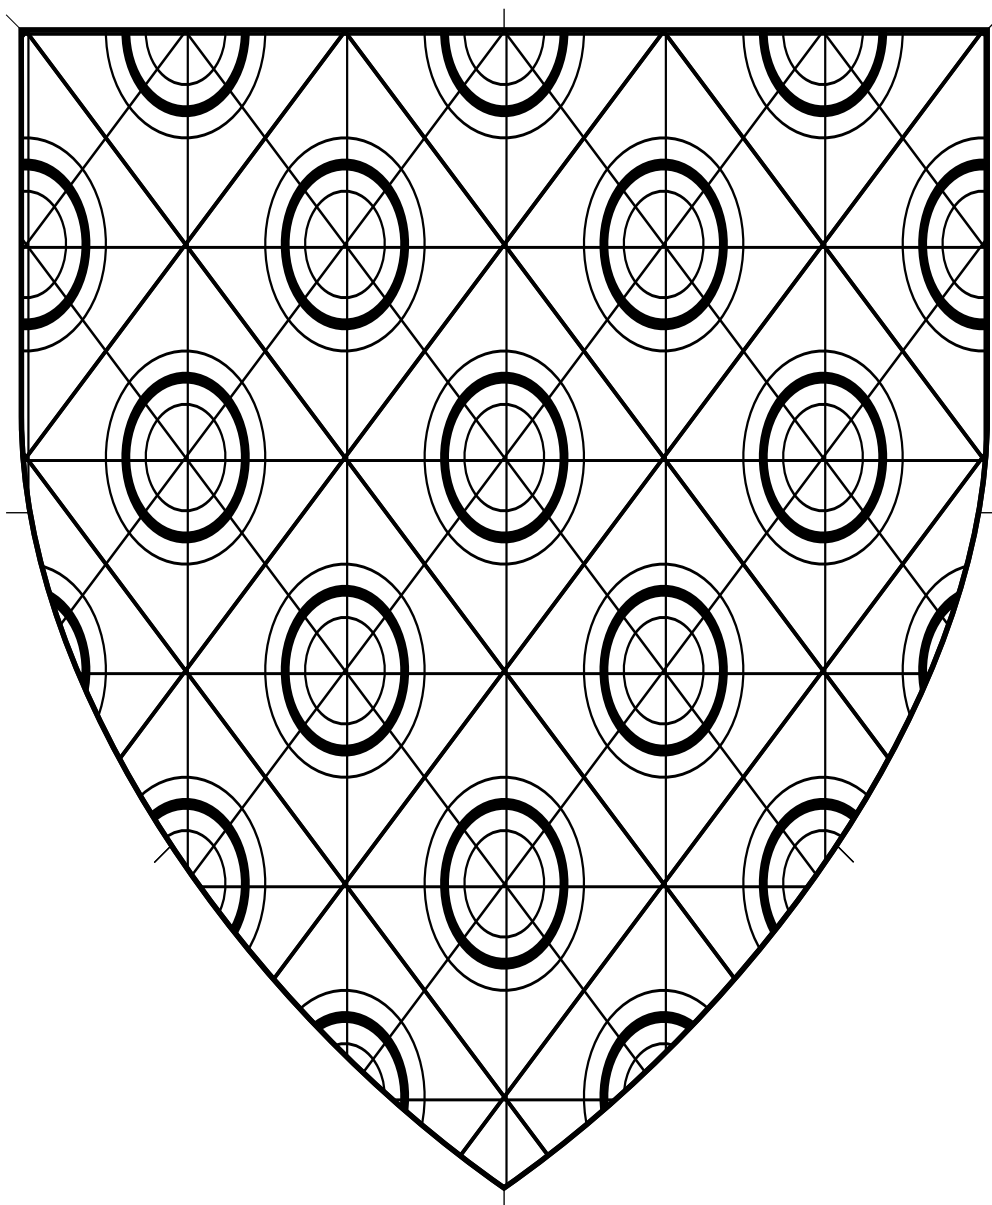

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

Semy of 5x5 • G.11

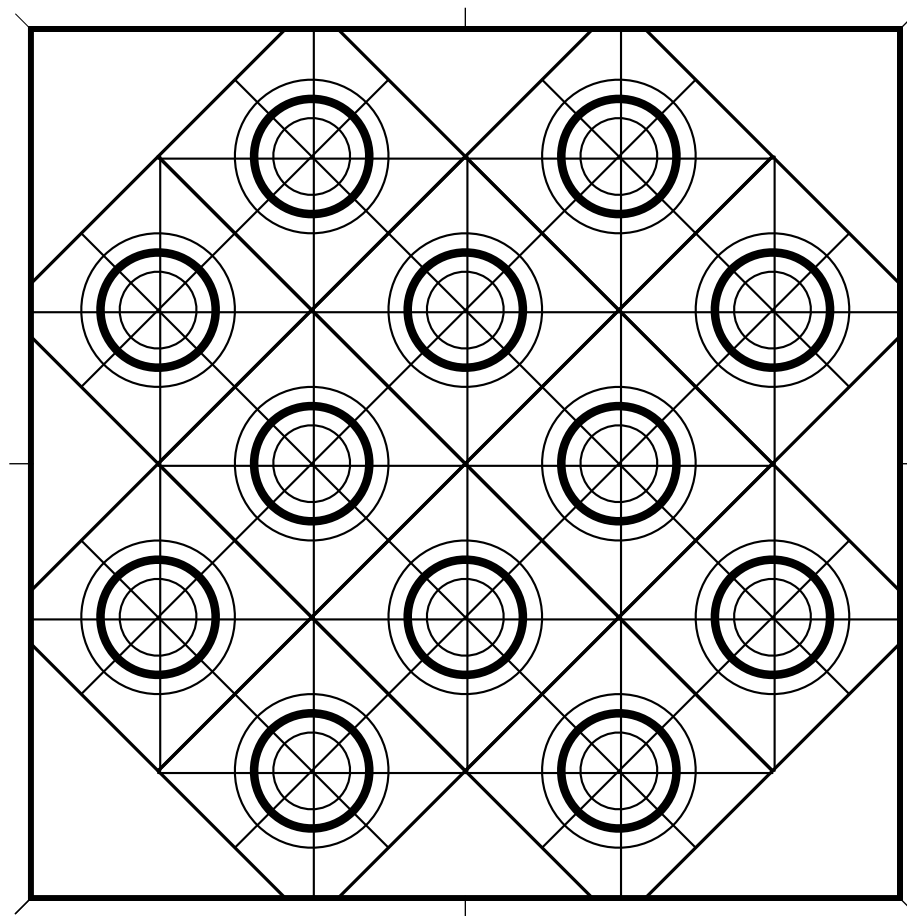

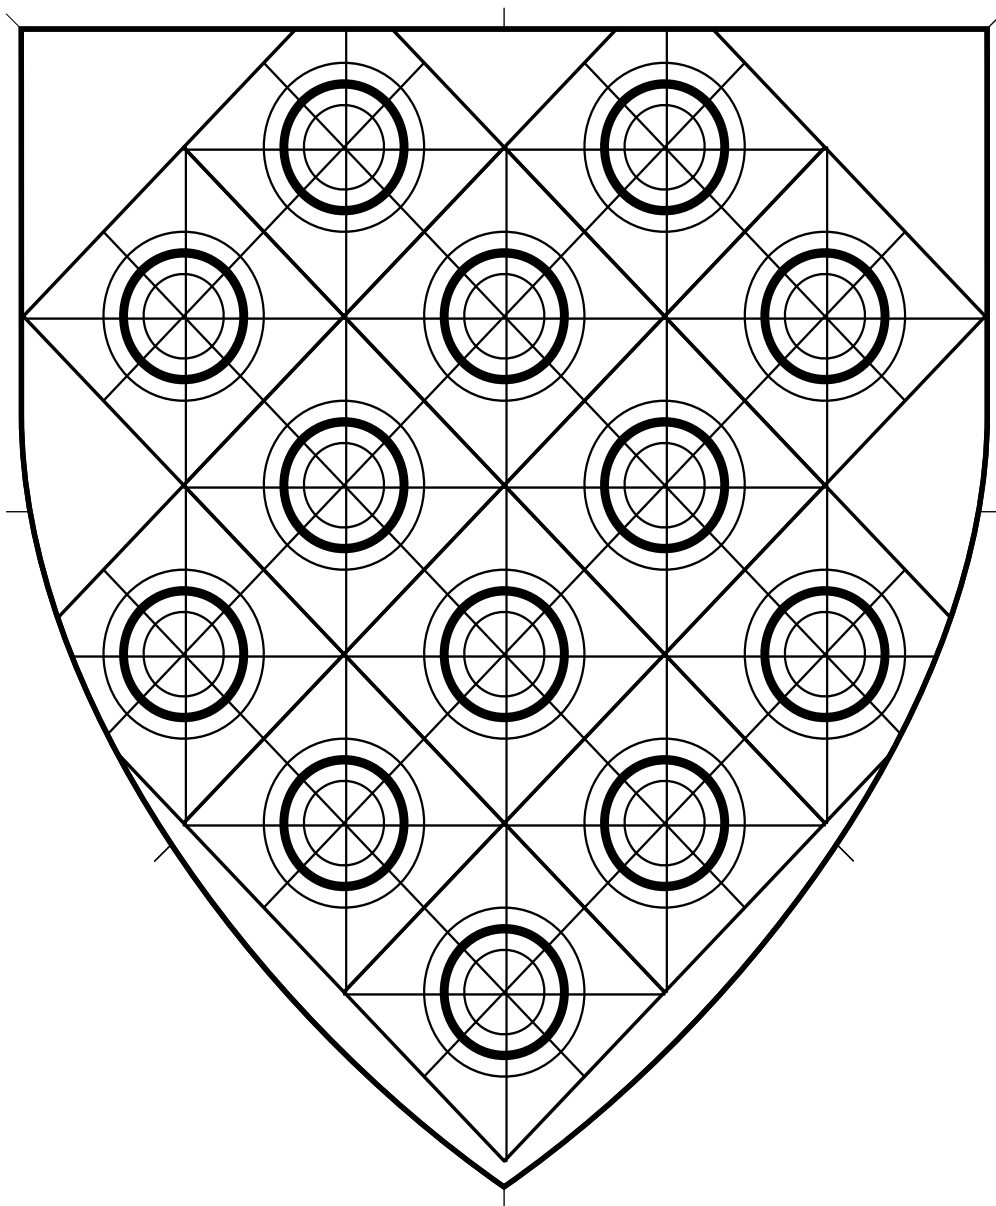

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

**Semy of 6x4 • G.12**

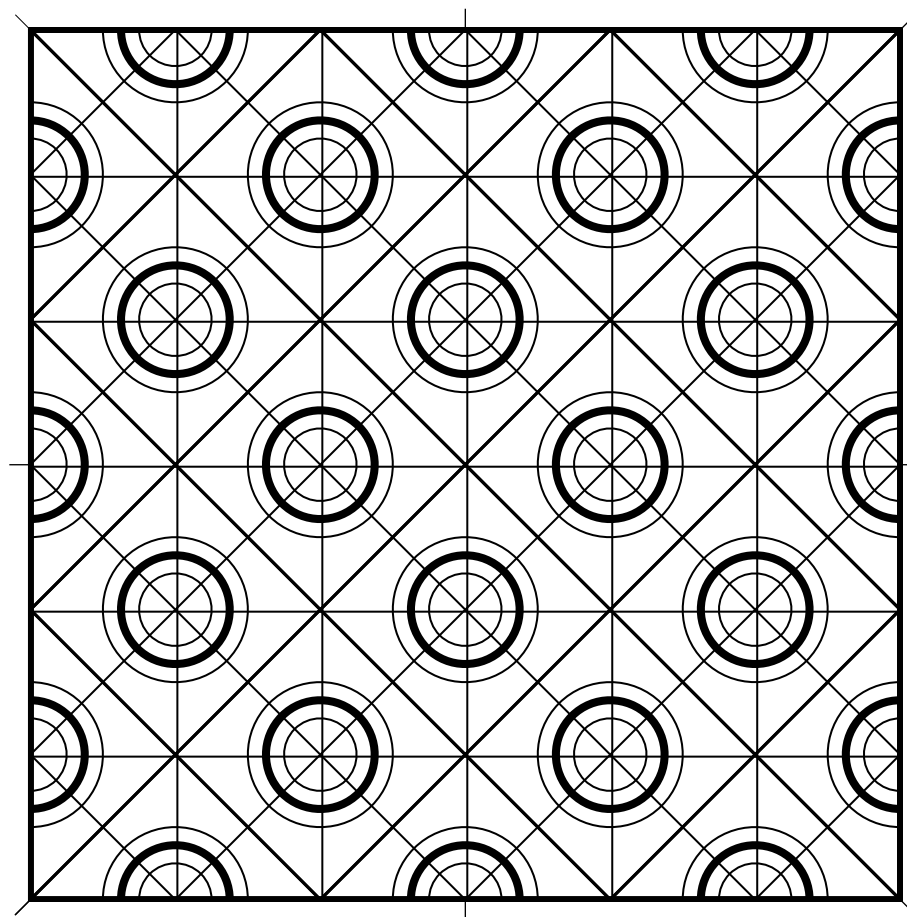

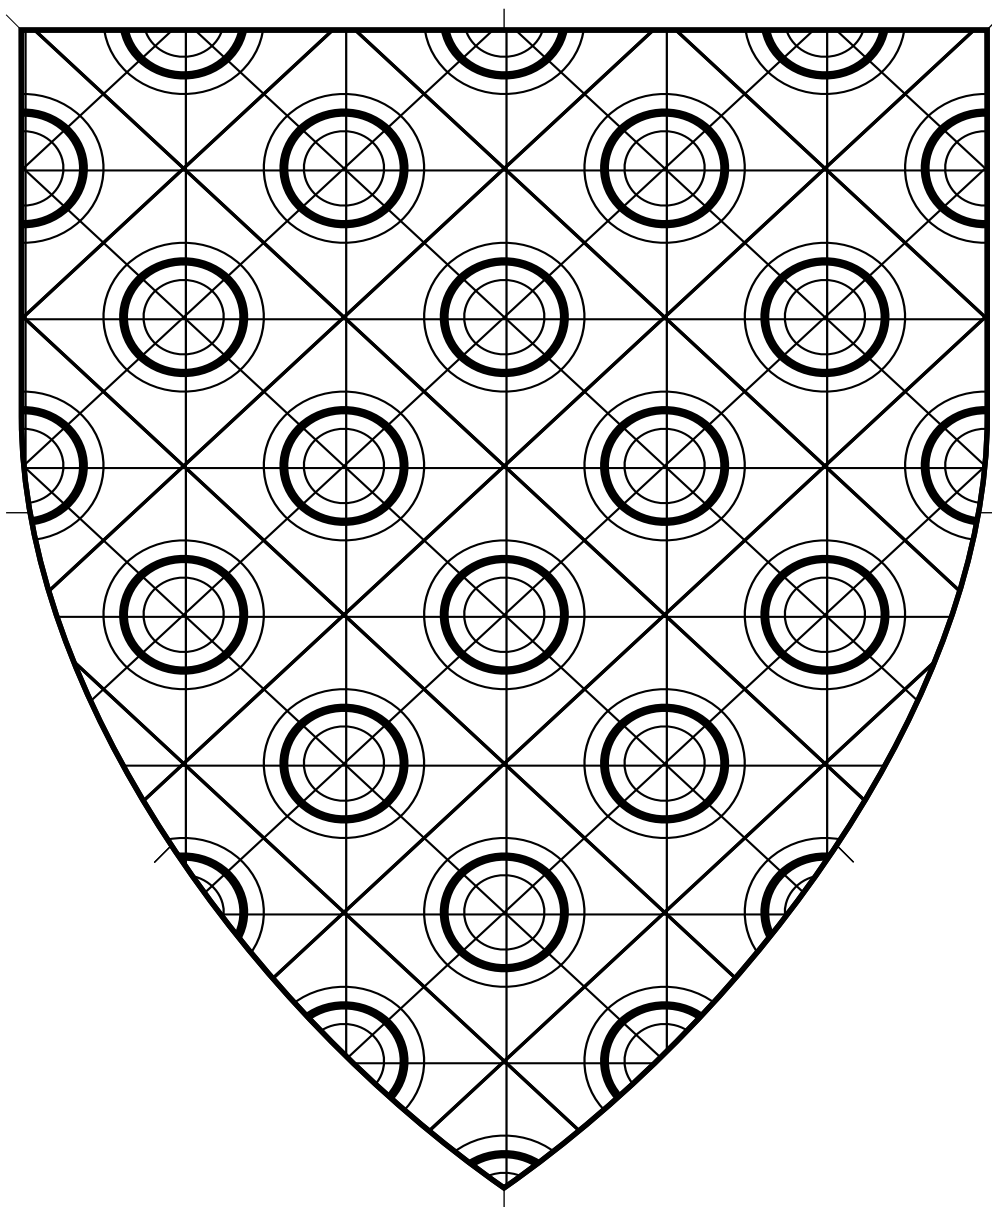

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

**Semy Cloth of 6x4 • G.13**

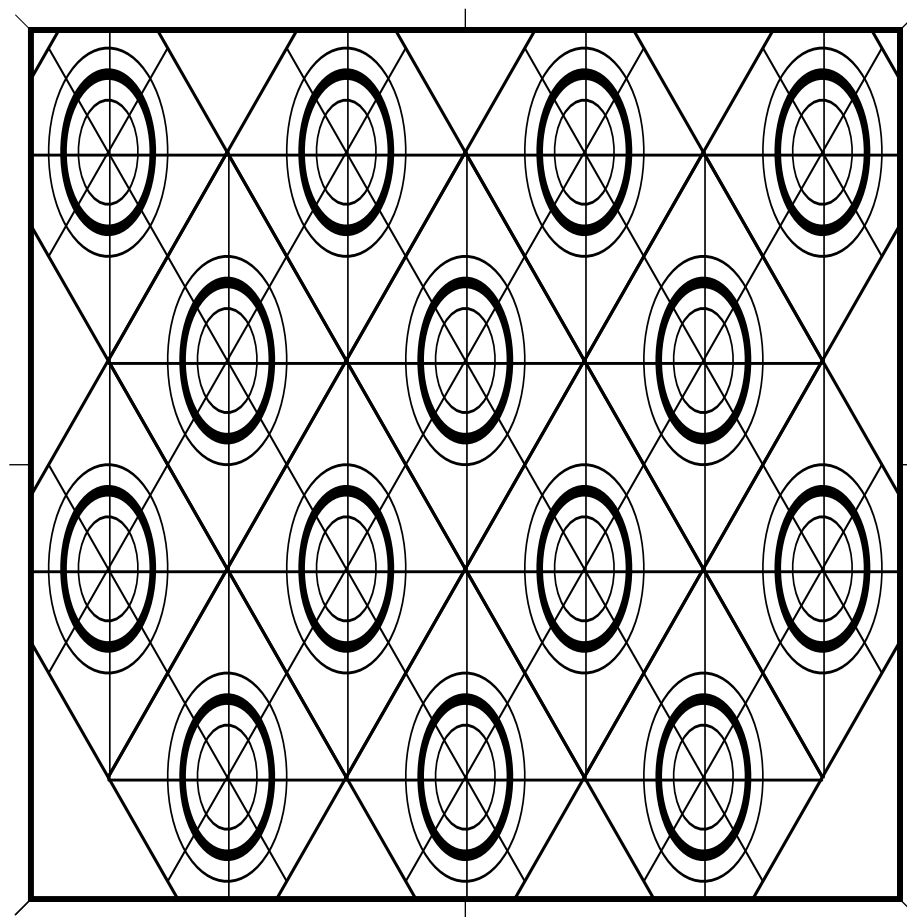

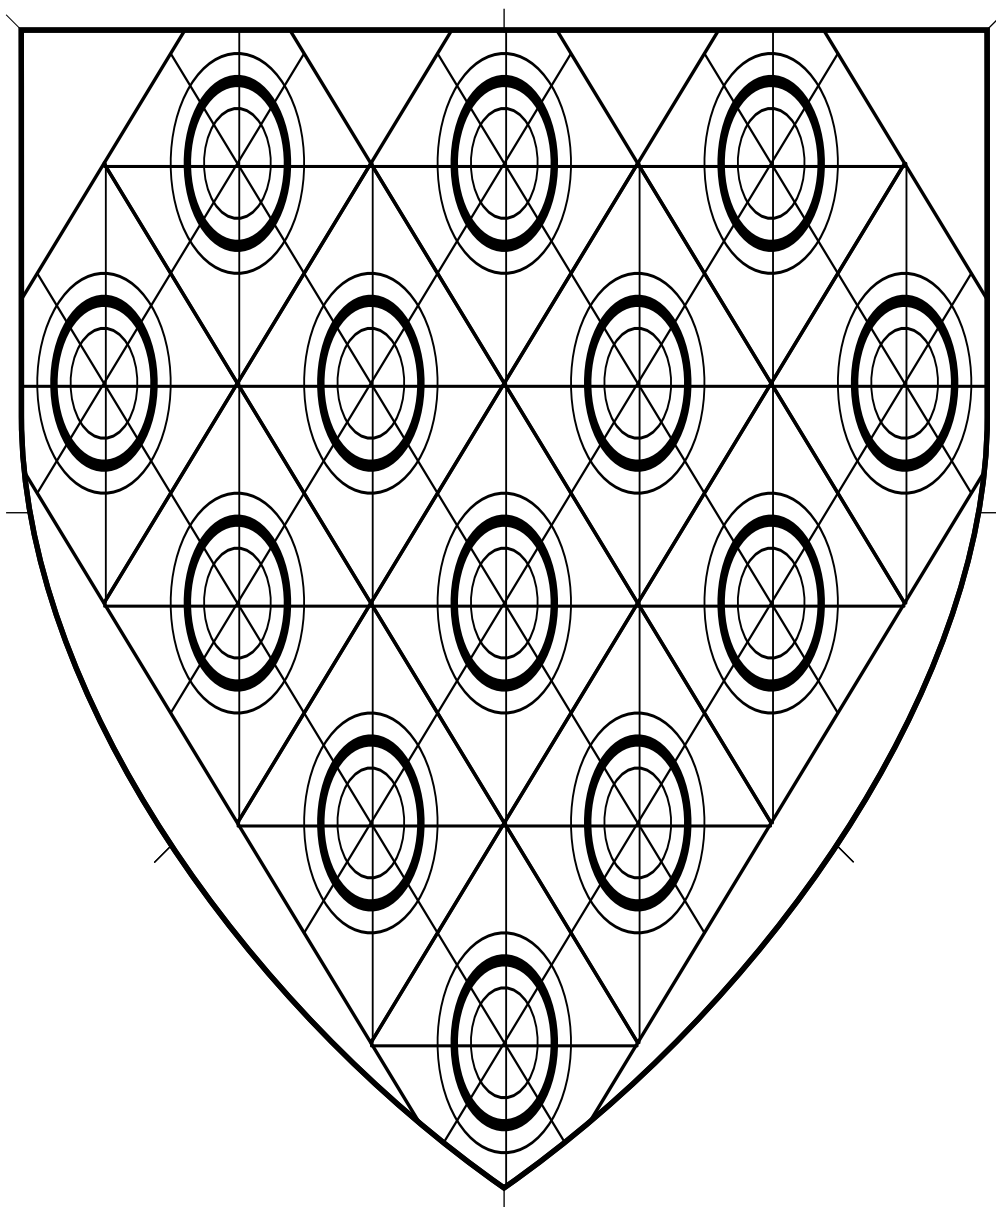

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

*Semy of 6x6* • G.14

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

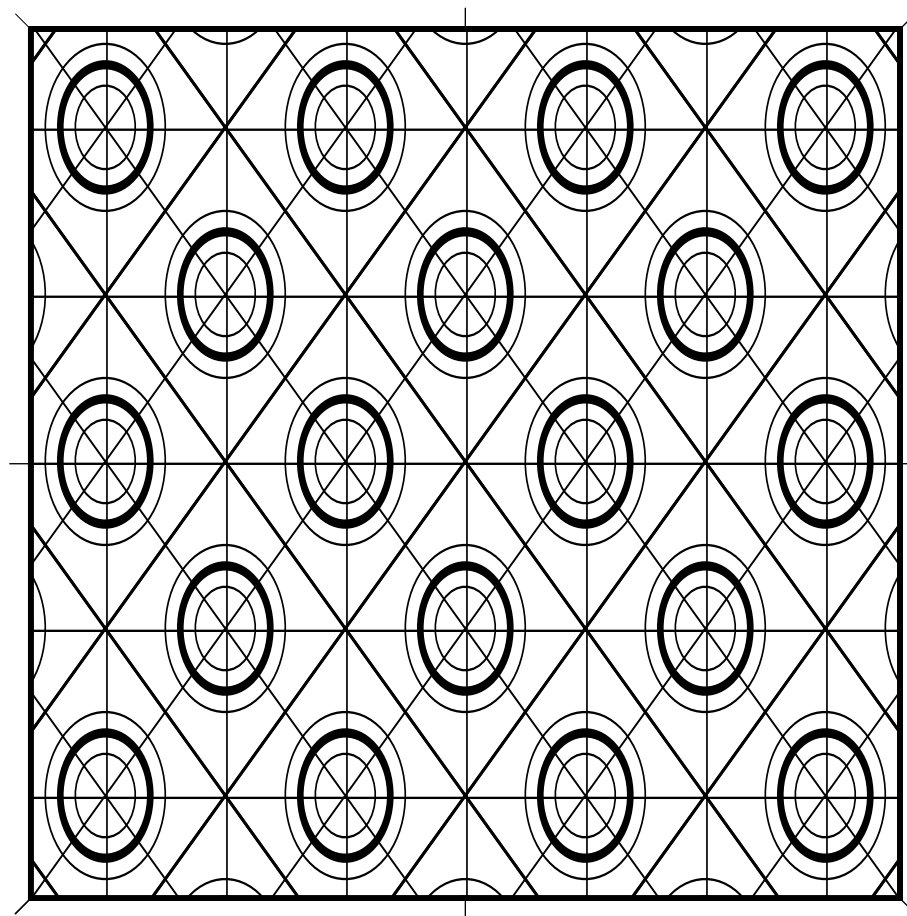

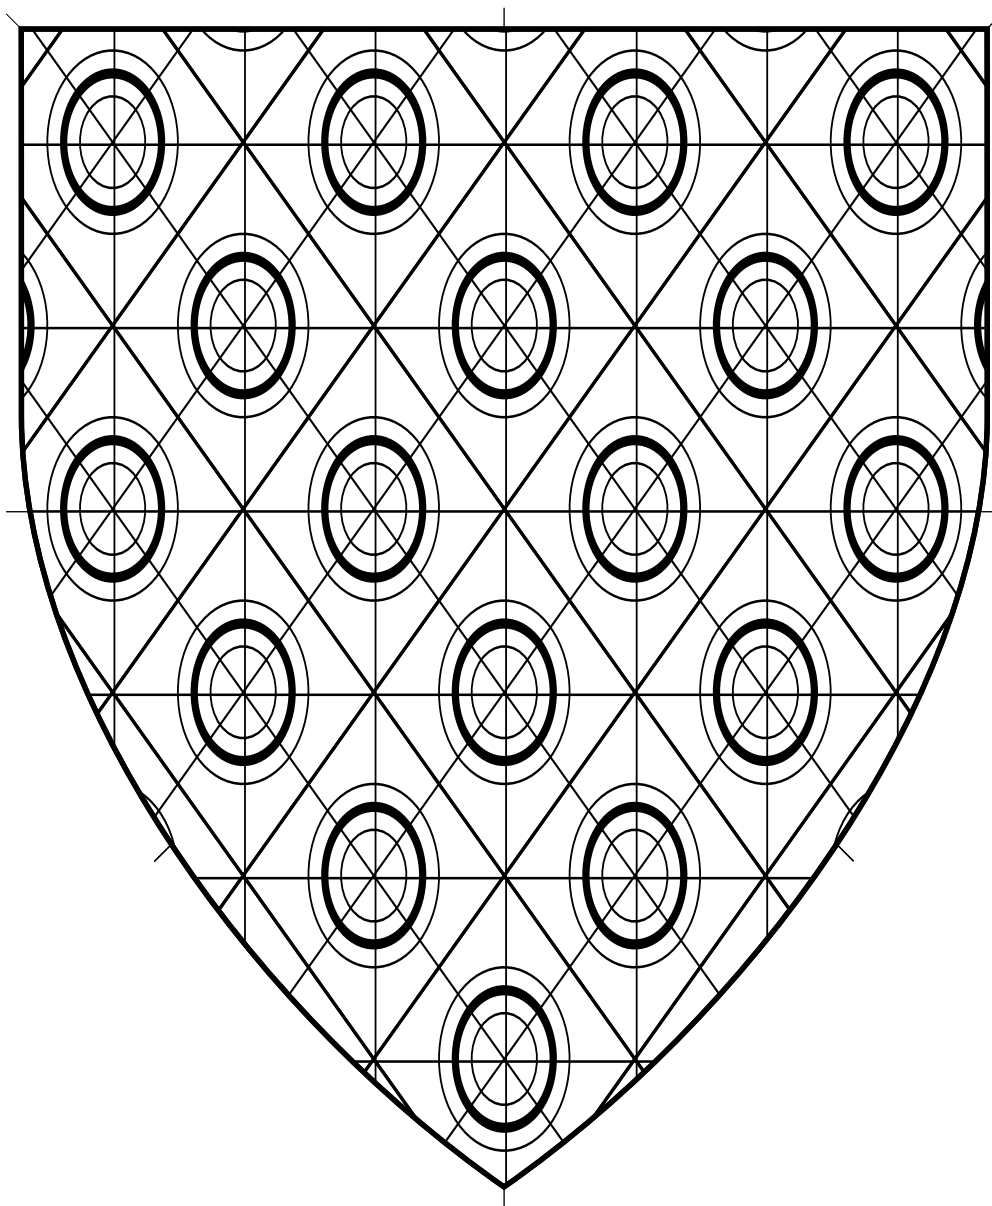

**Semy Cloth of 6x6 • G.15**

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

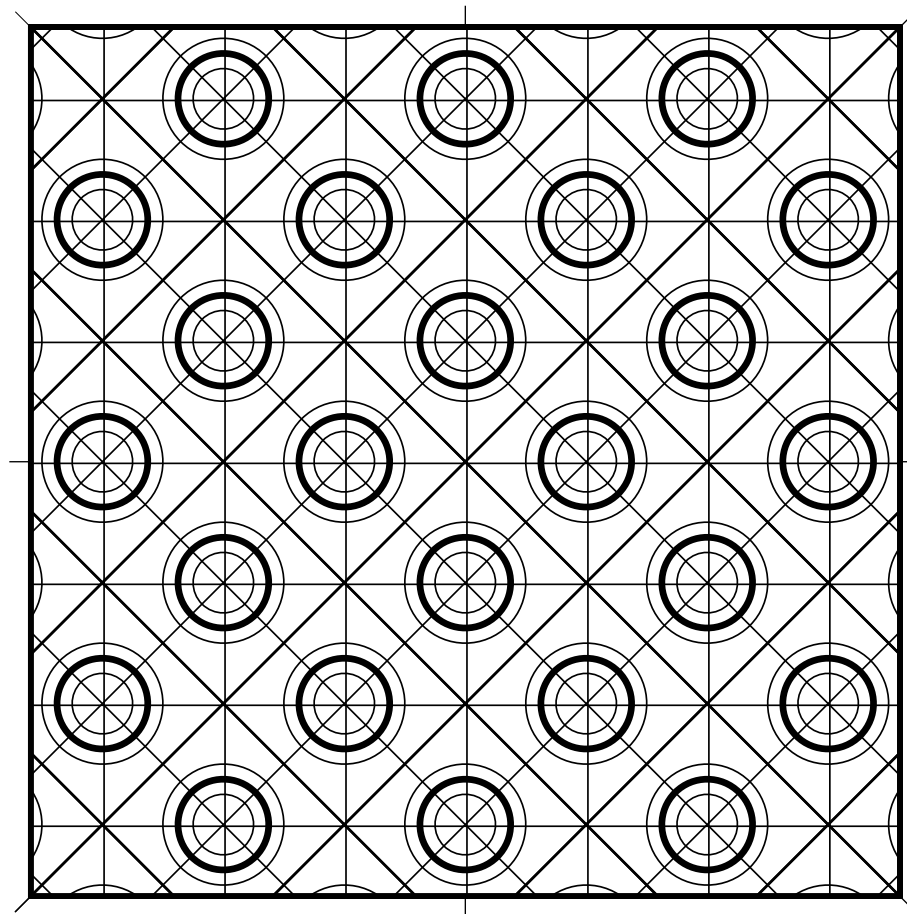

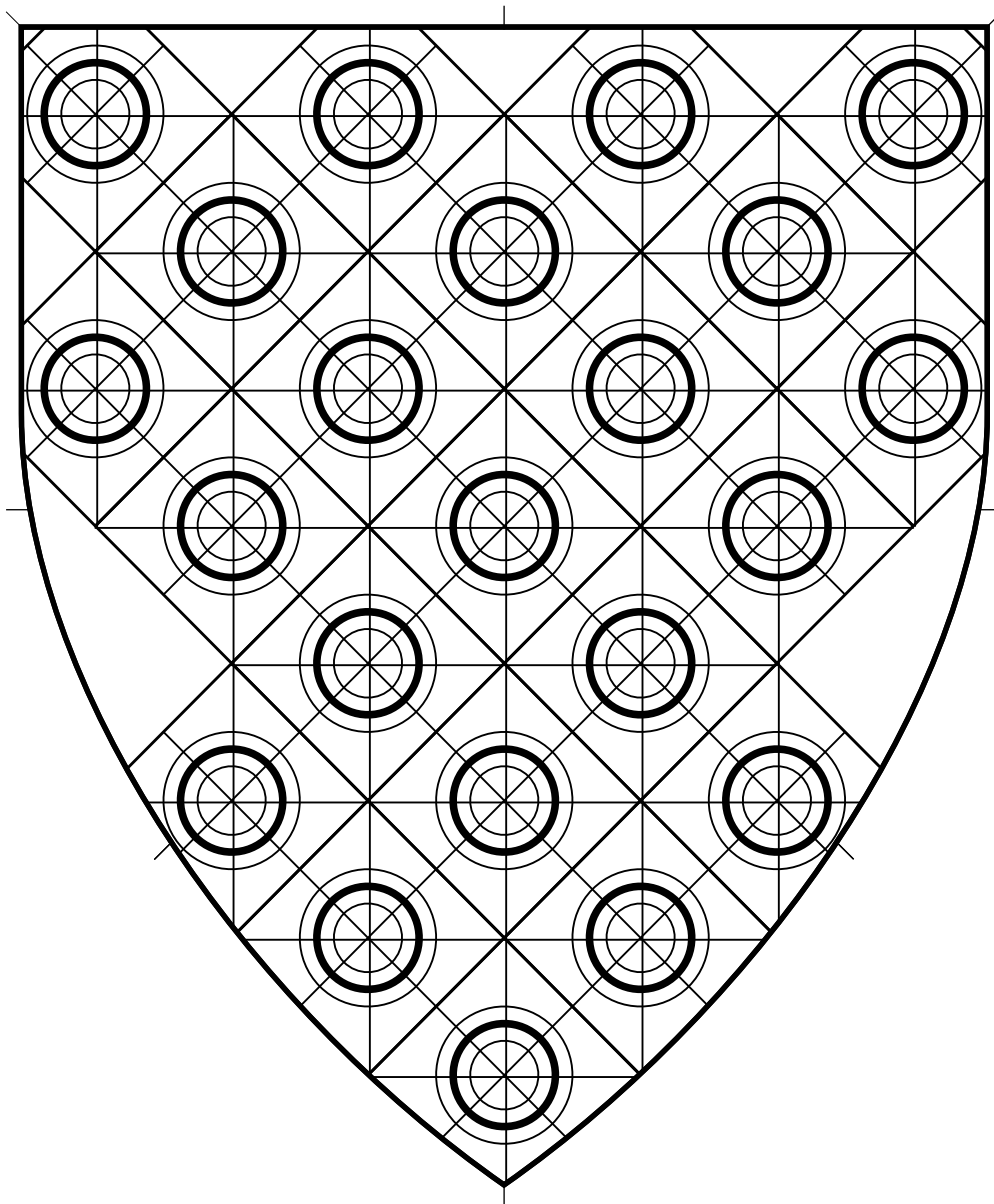

*Semy of 7x4* • **G.16**

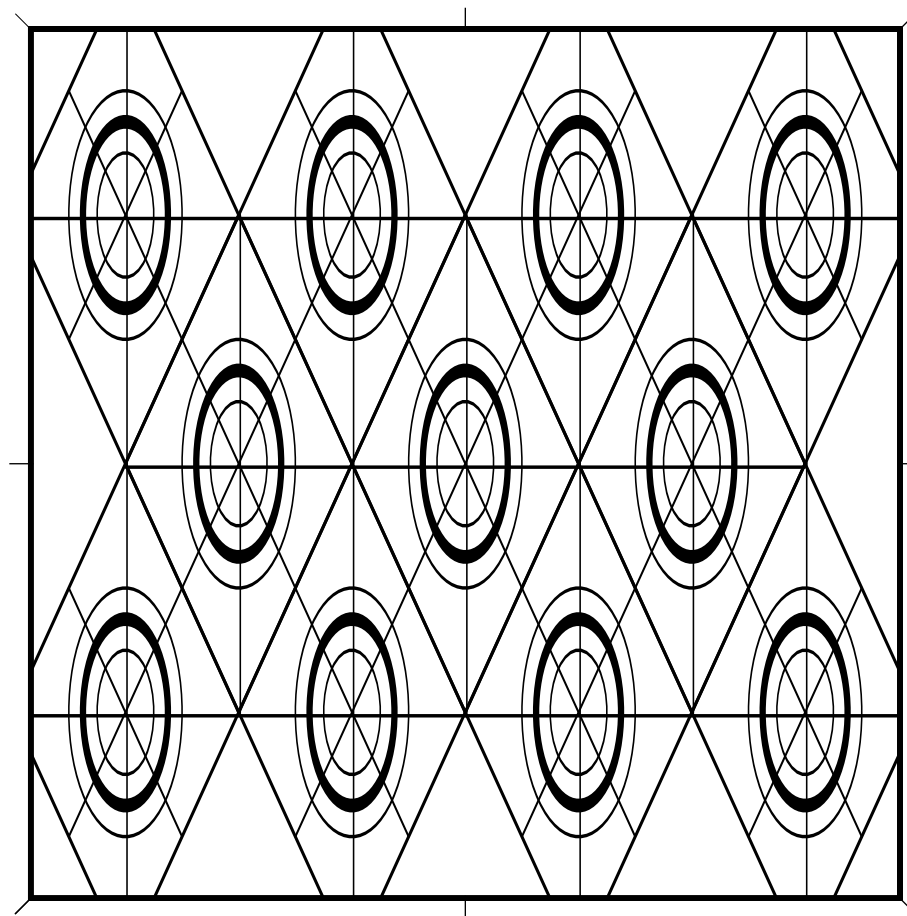

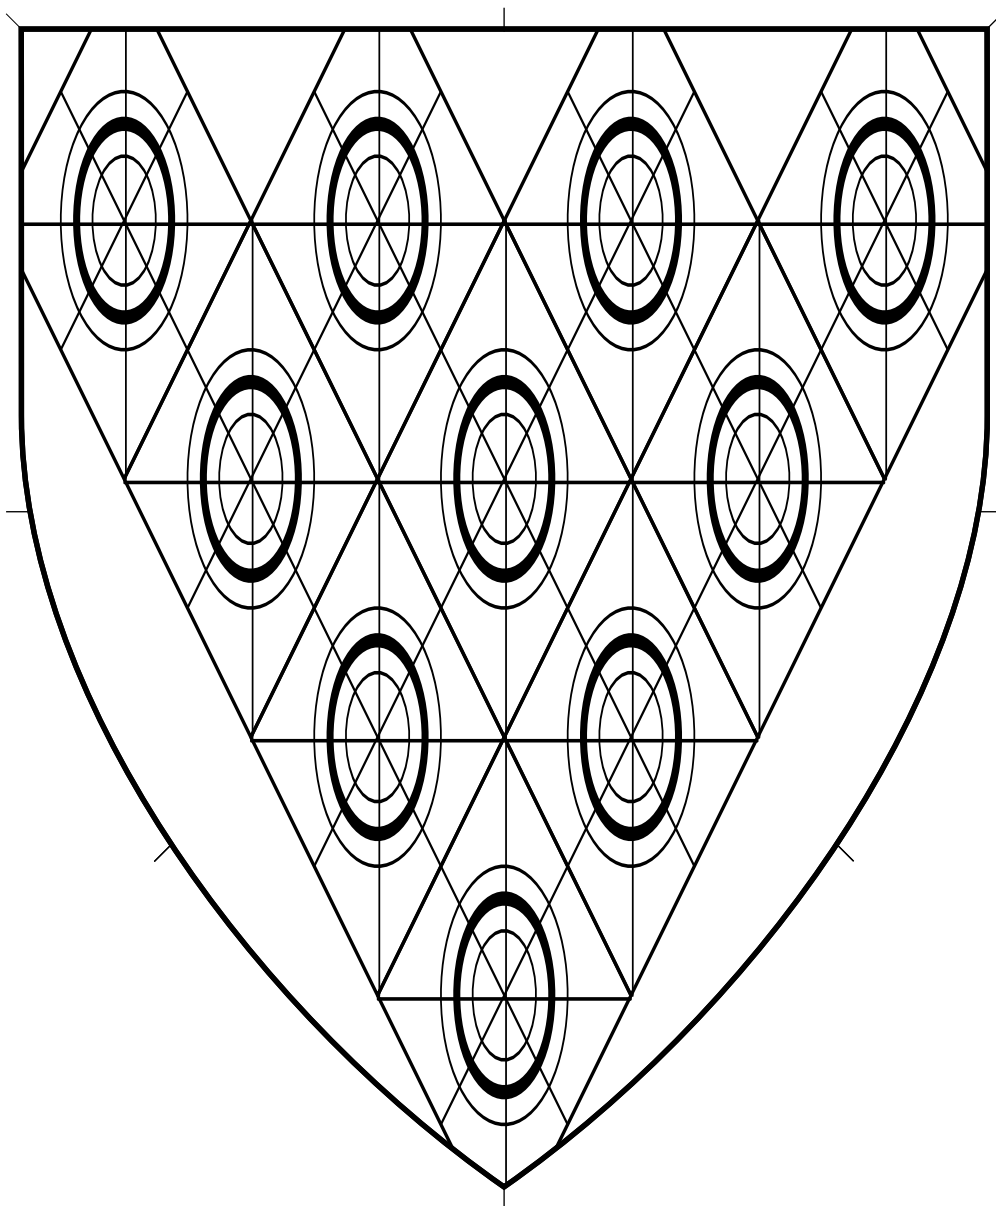

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

*Semy of 7x5 • G.17*

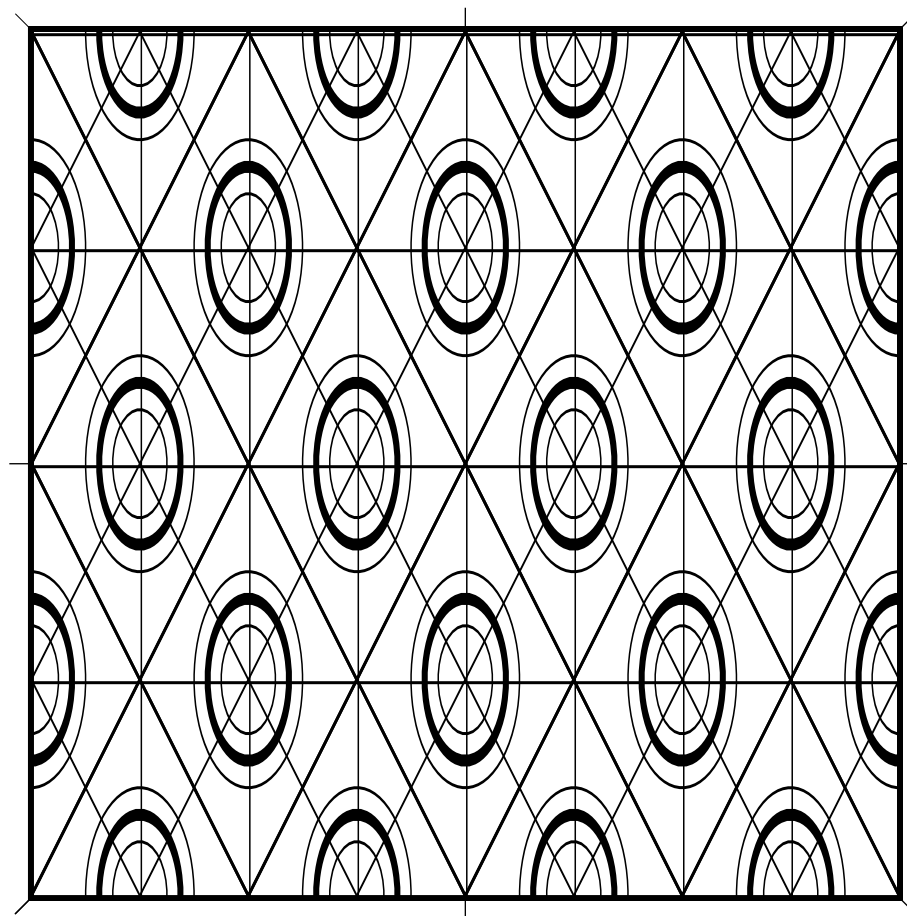

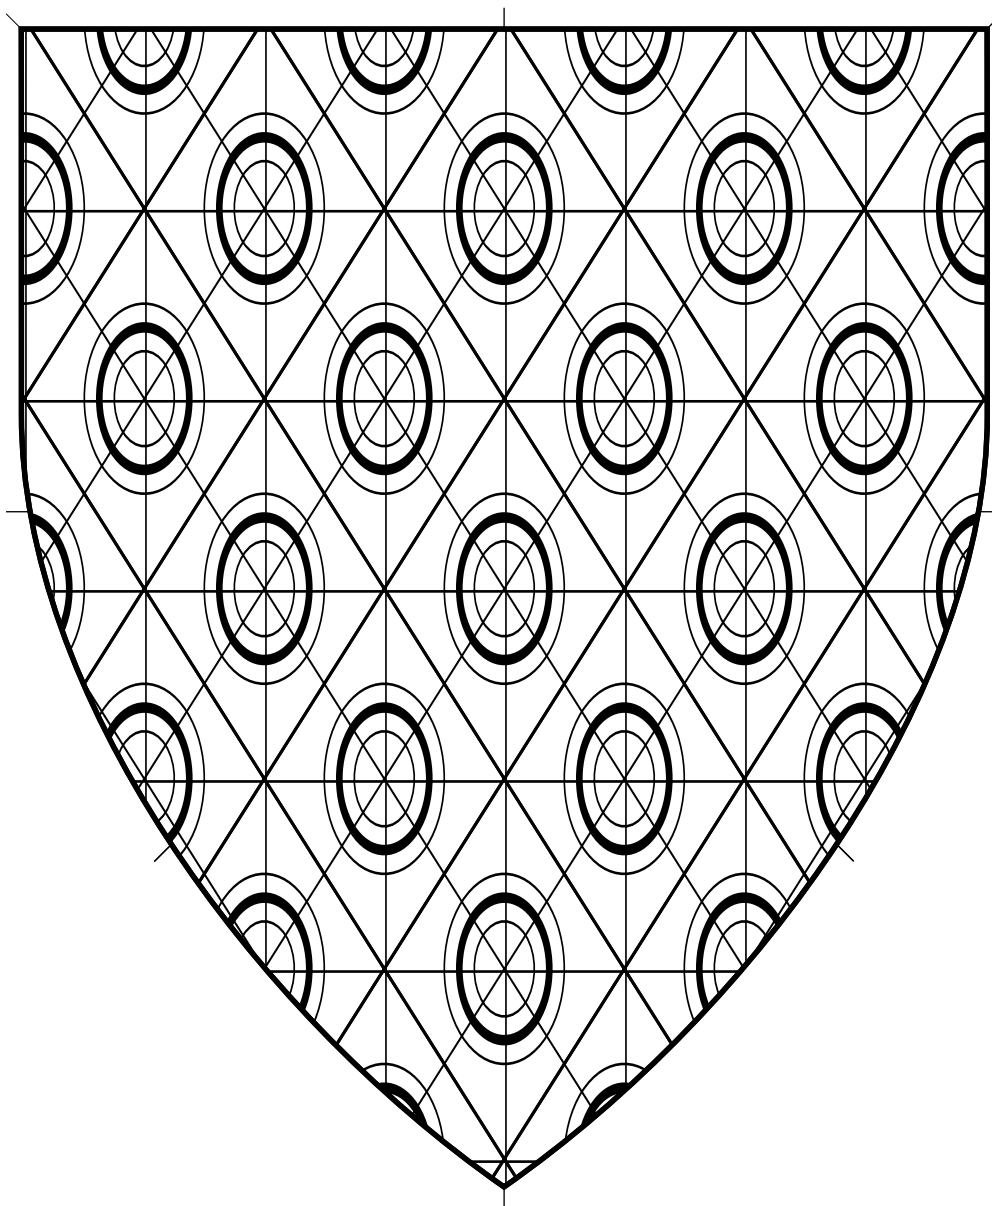

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

*Semy of 7x7* • **G.18**

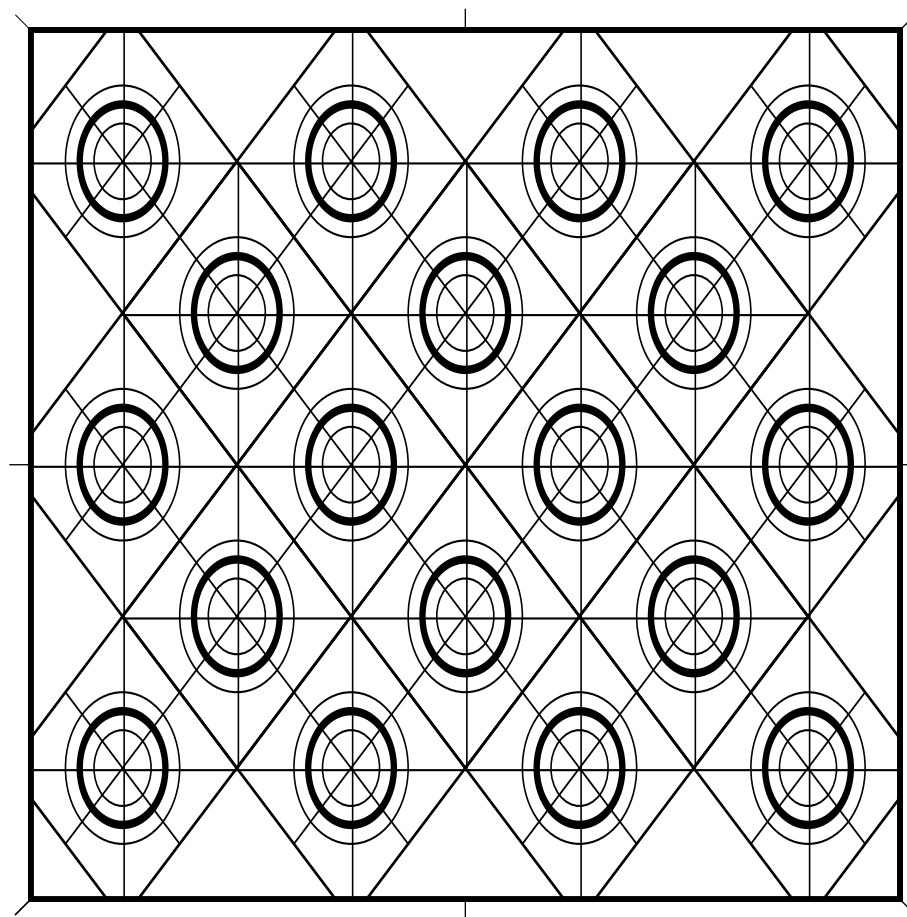

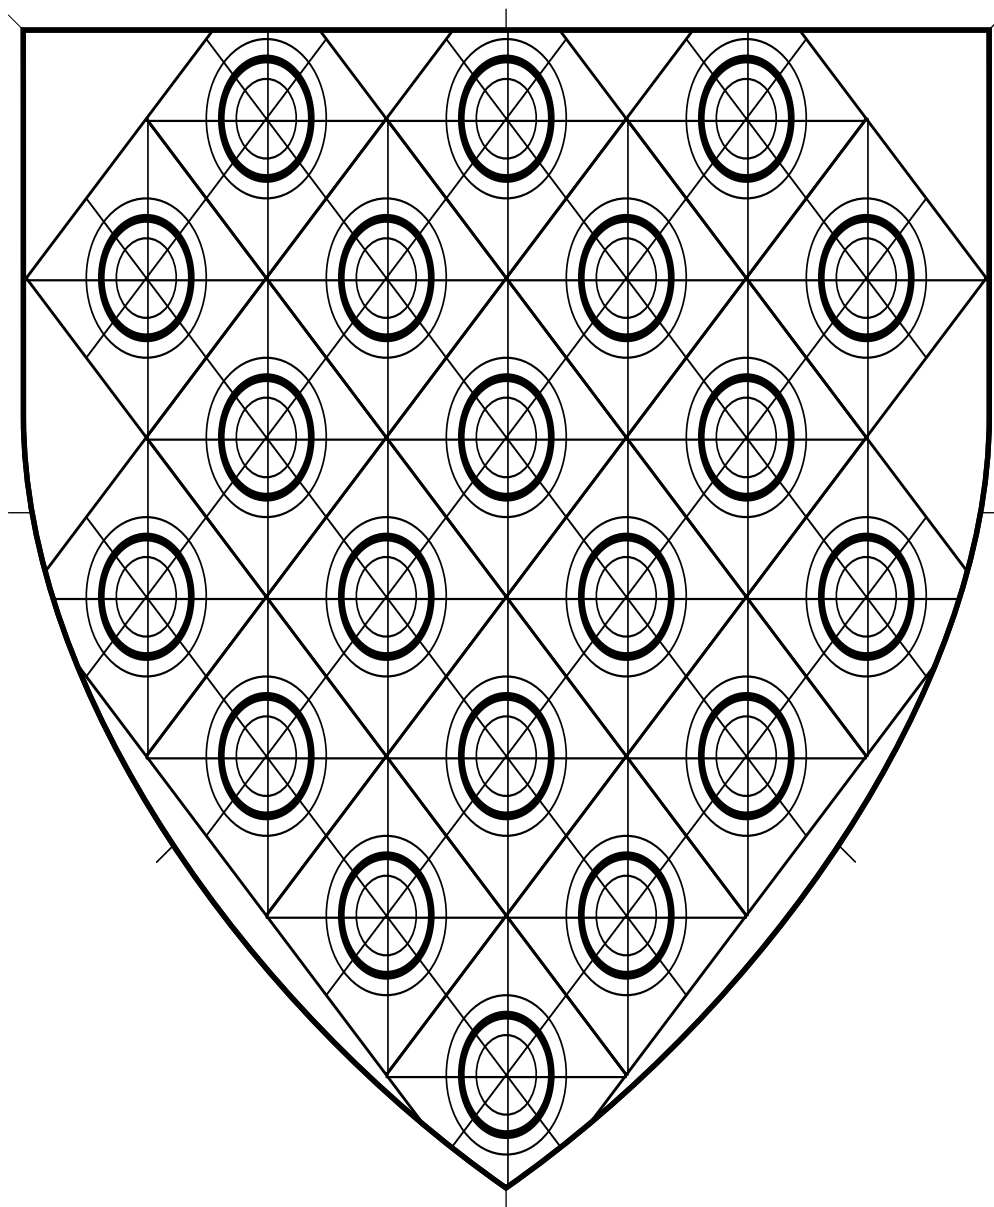

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

Semy of 8x4  G.19

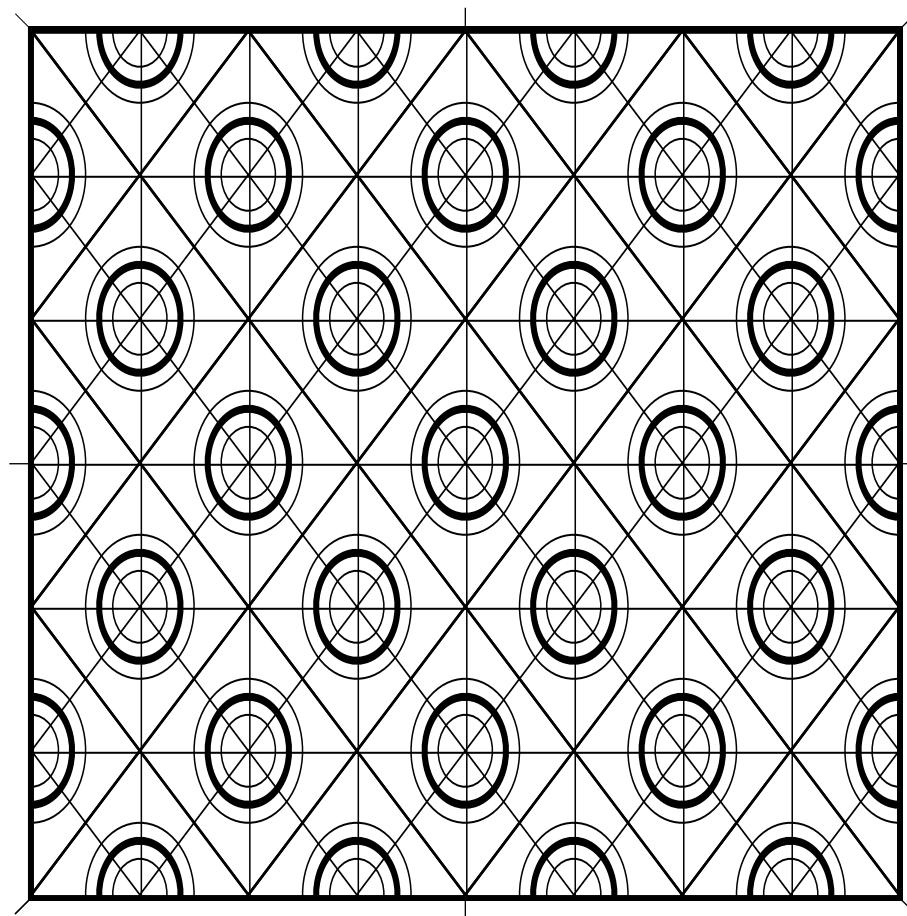

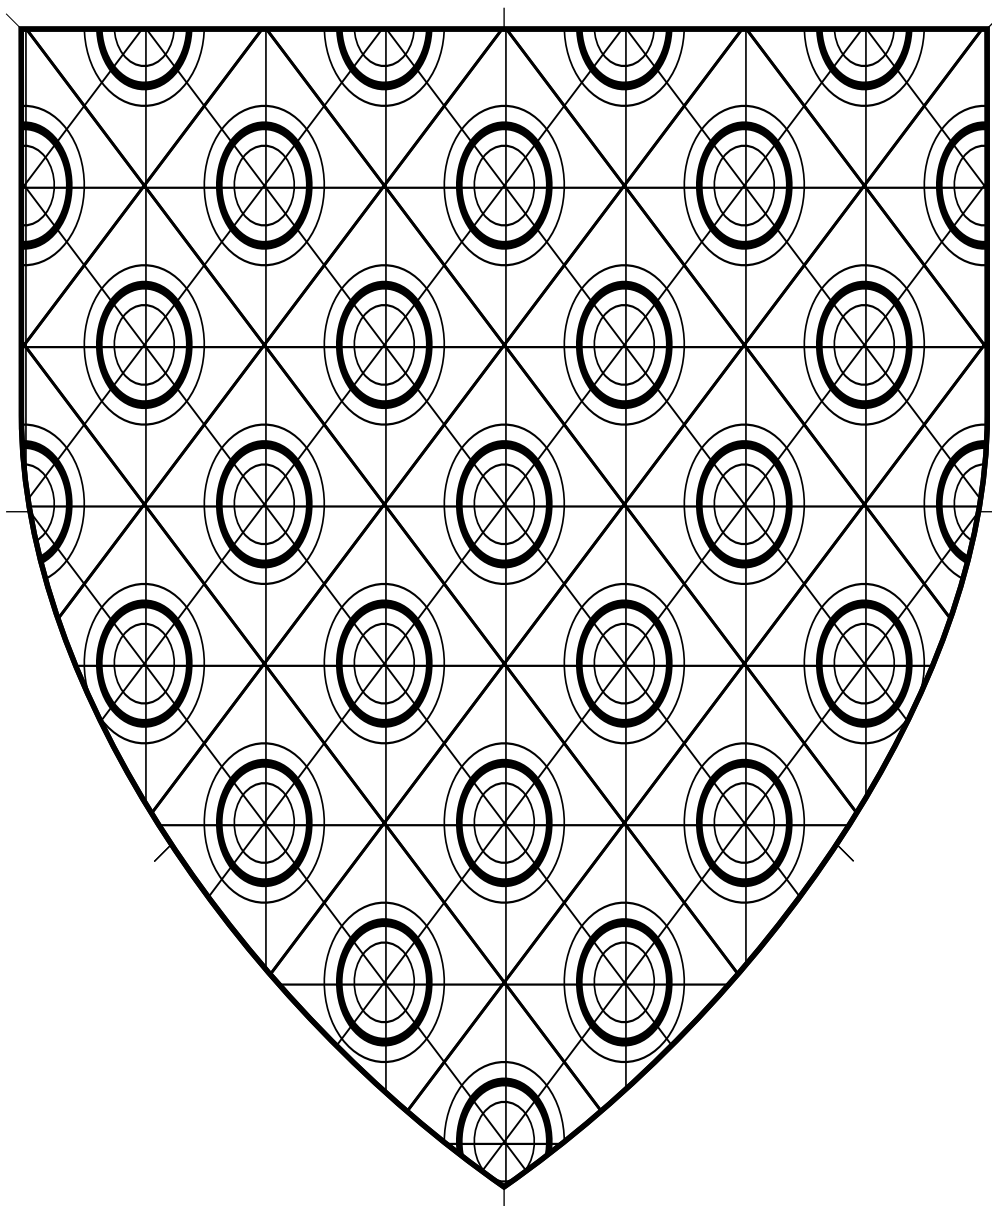

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

**Semy Cloth of 8x4 • G.20**

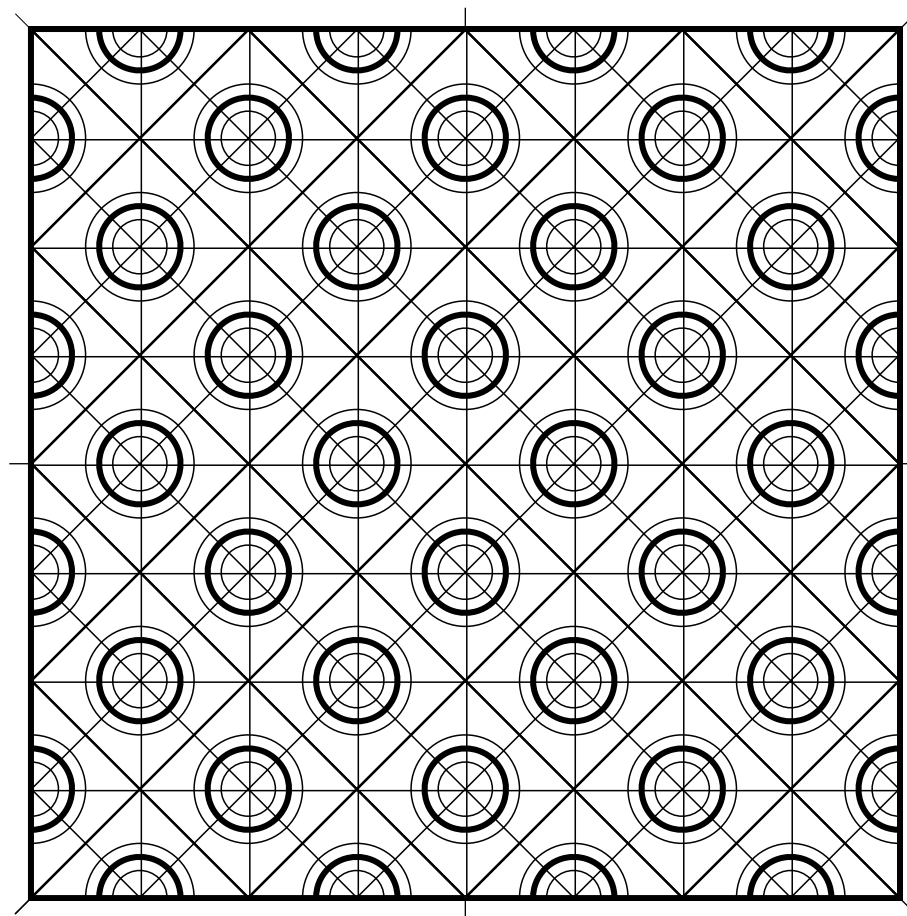

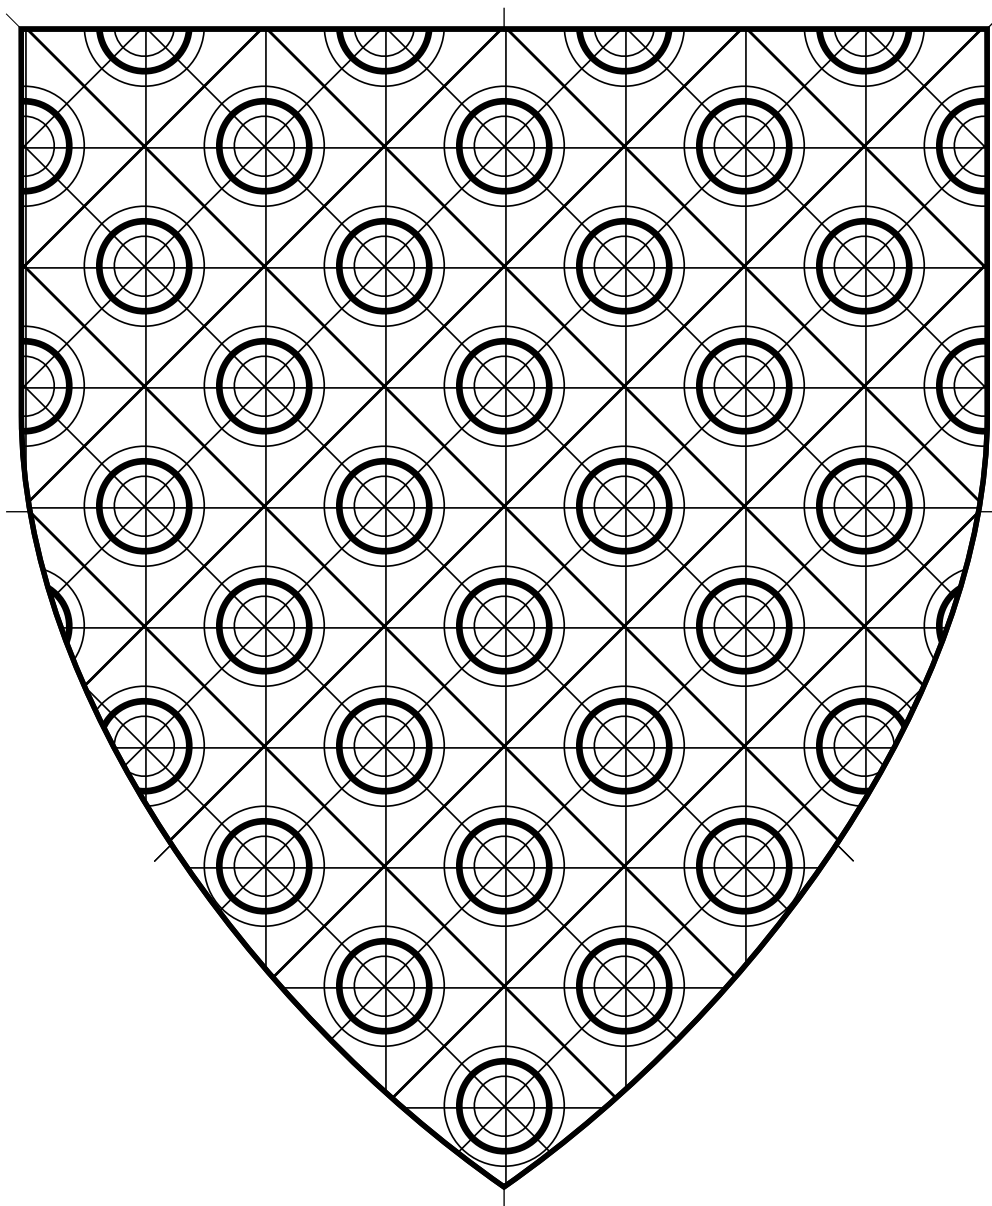

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

*Semy of 8x6* • G.21

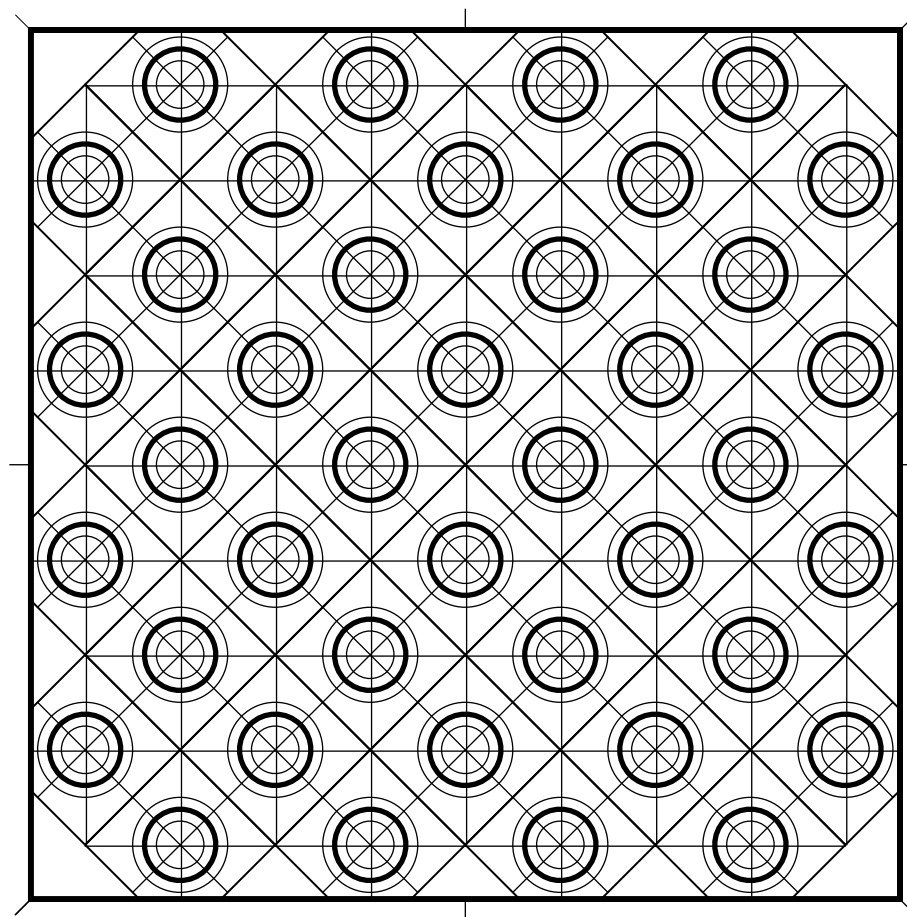

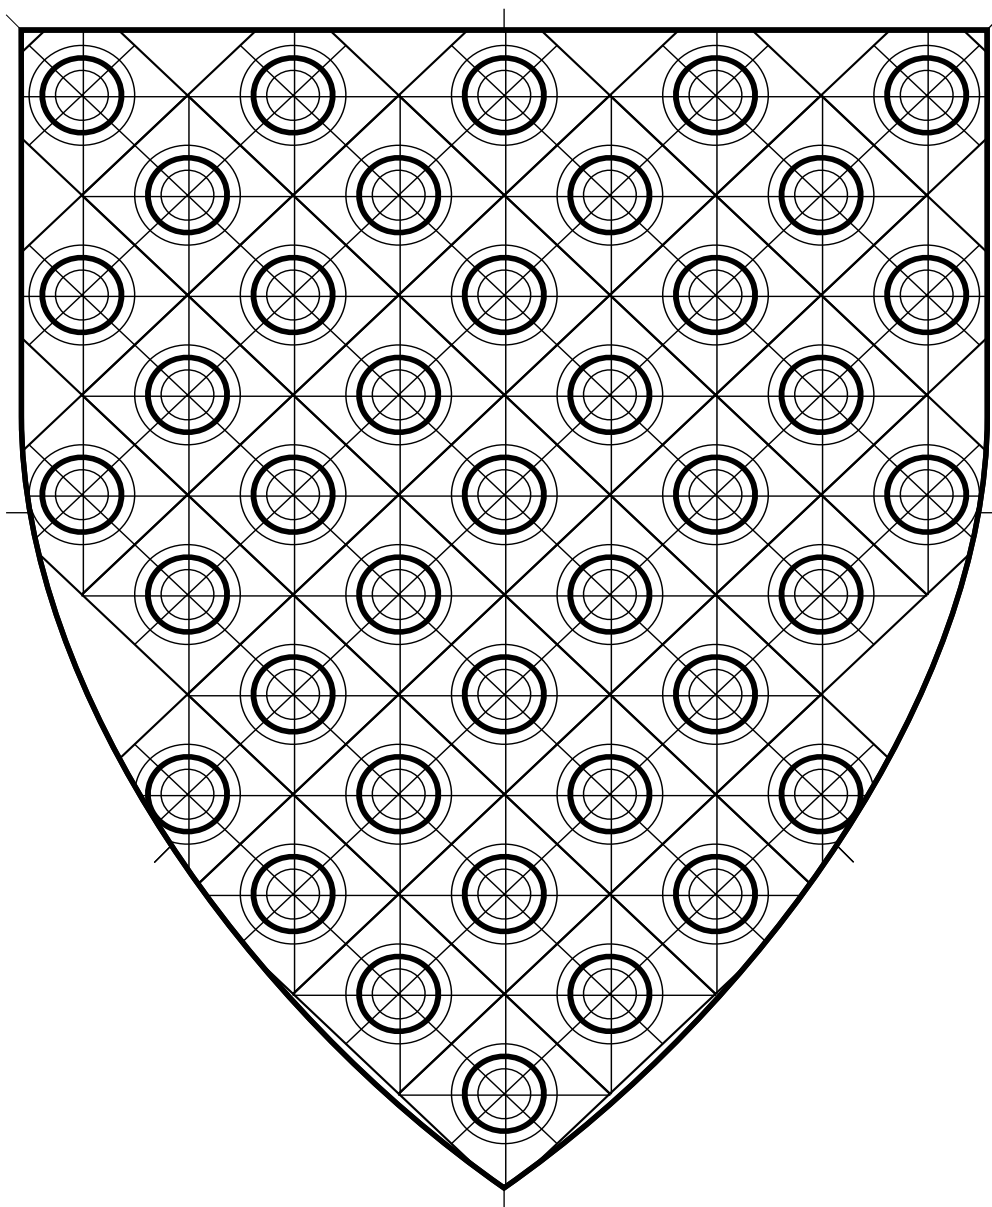

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

**Semy Cloth of 8x6 • G.22**

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

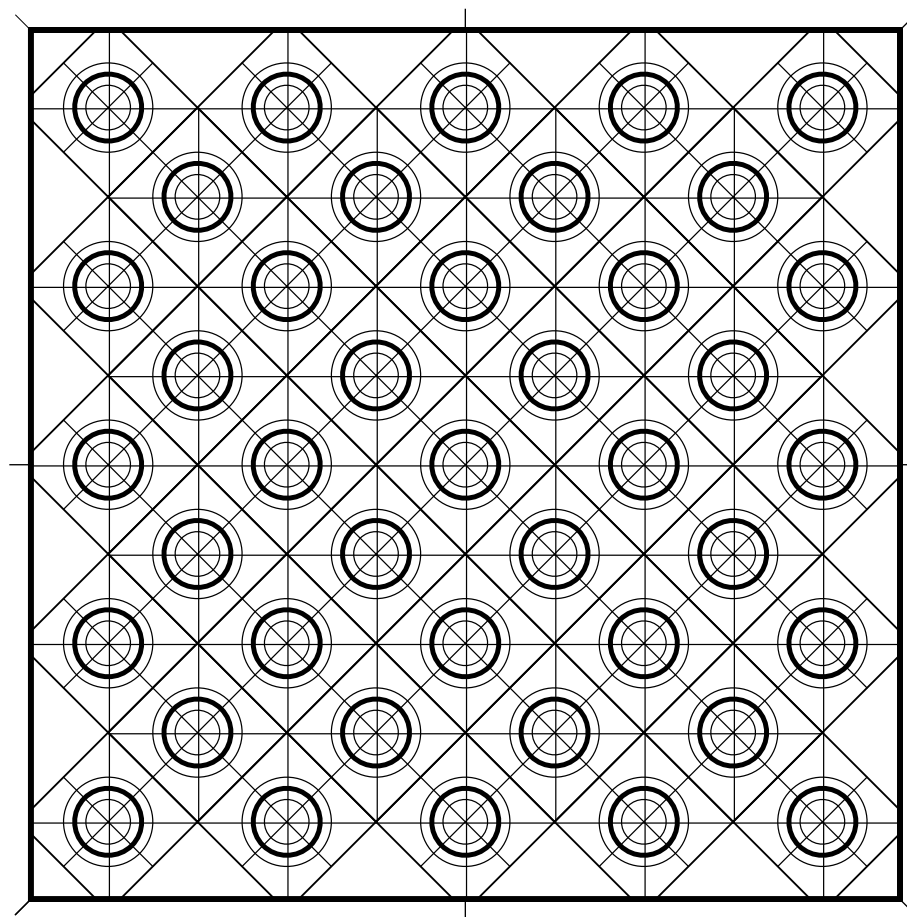

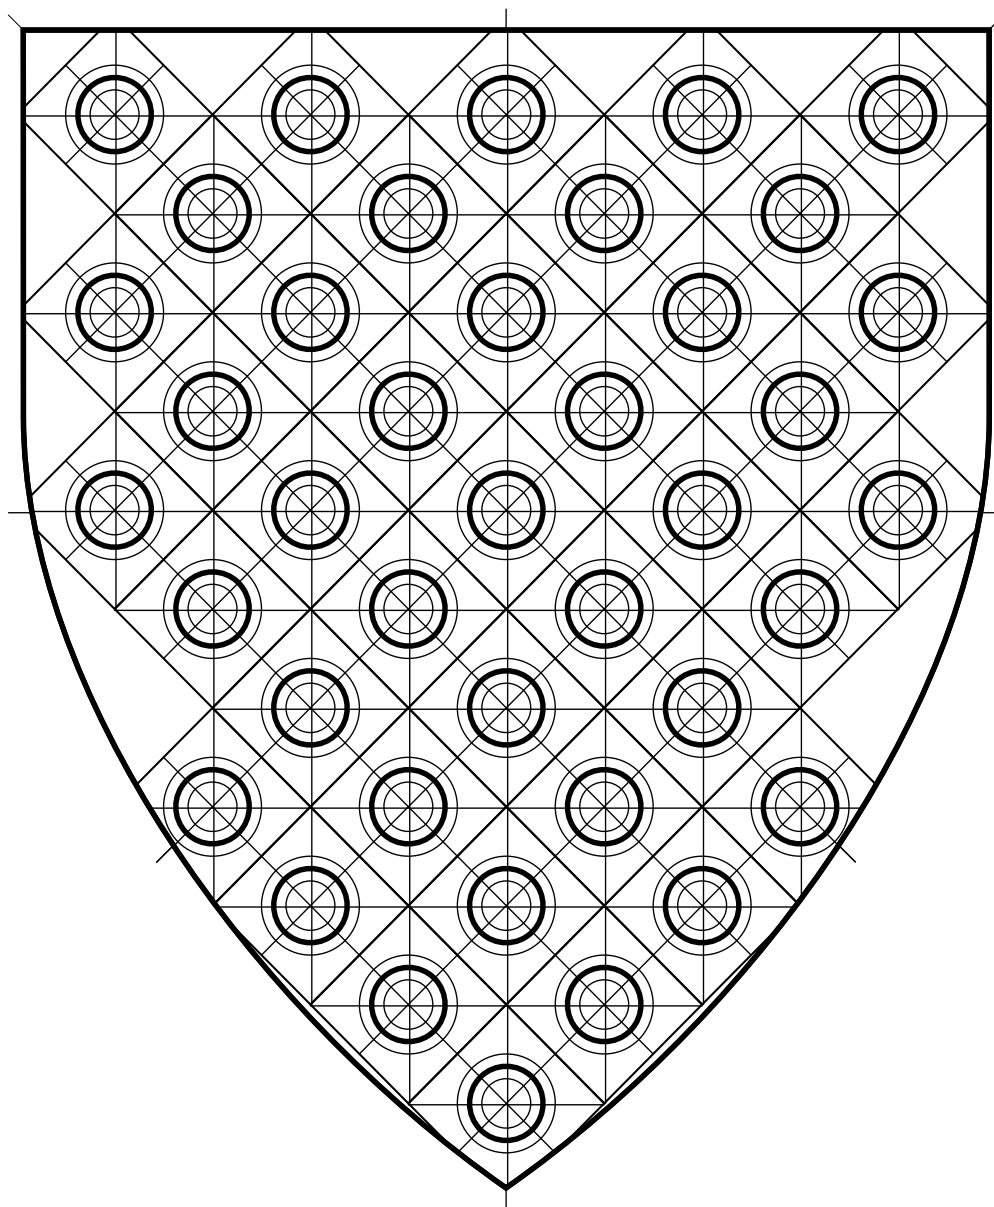

**Semy Cloth of 8x8 • G.23**

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

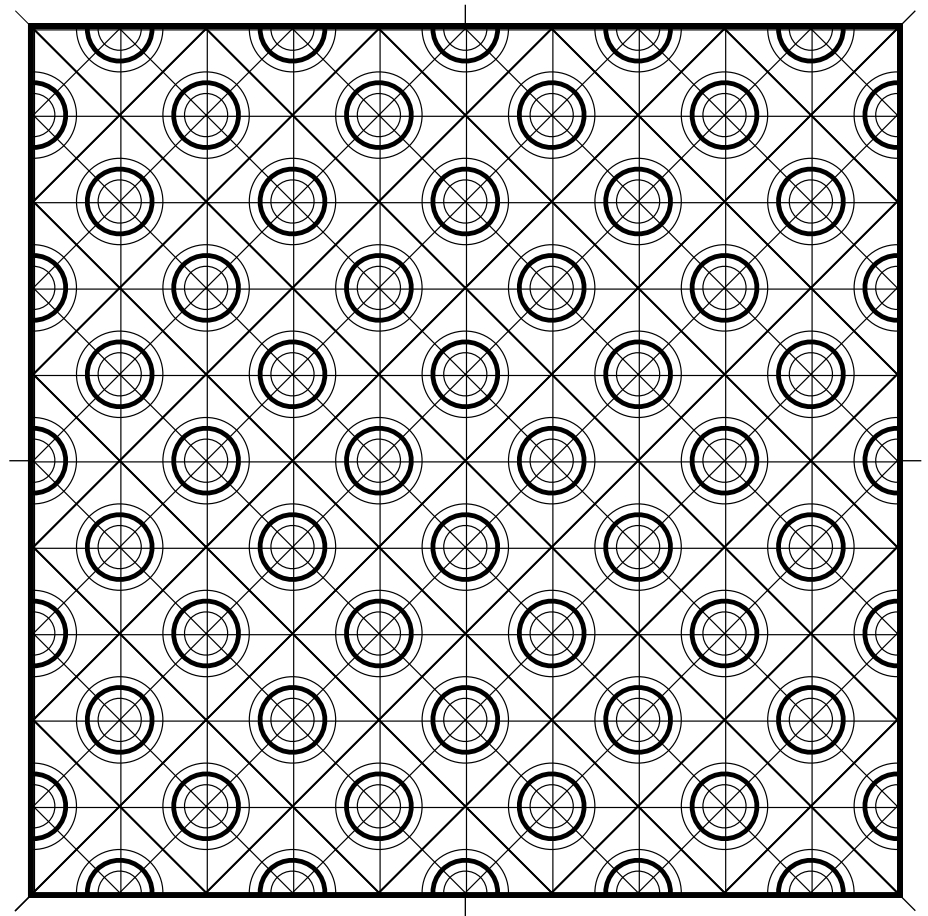

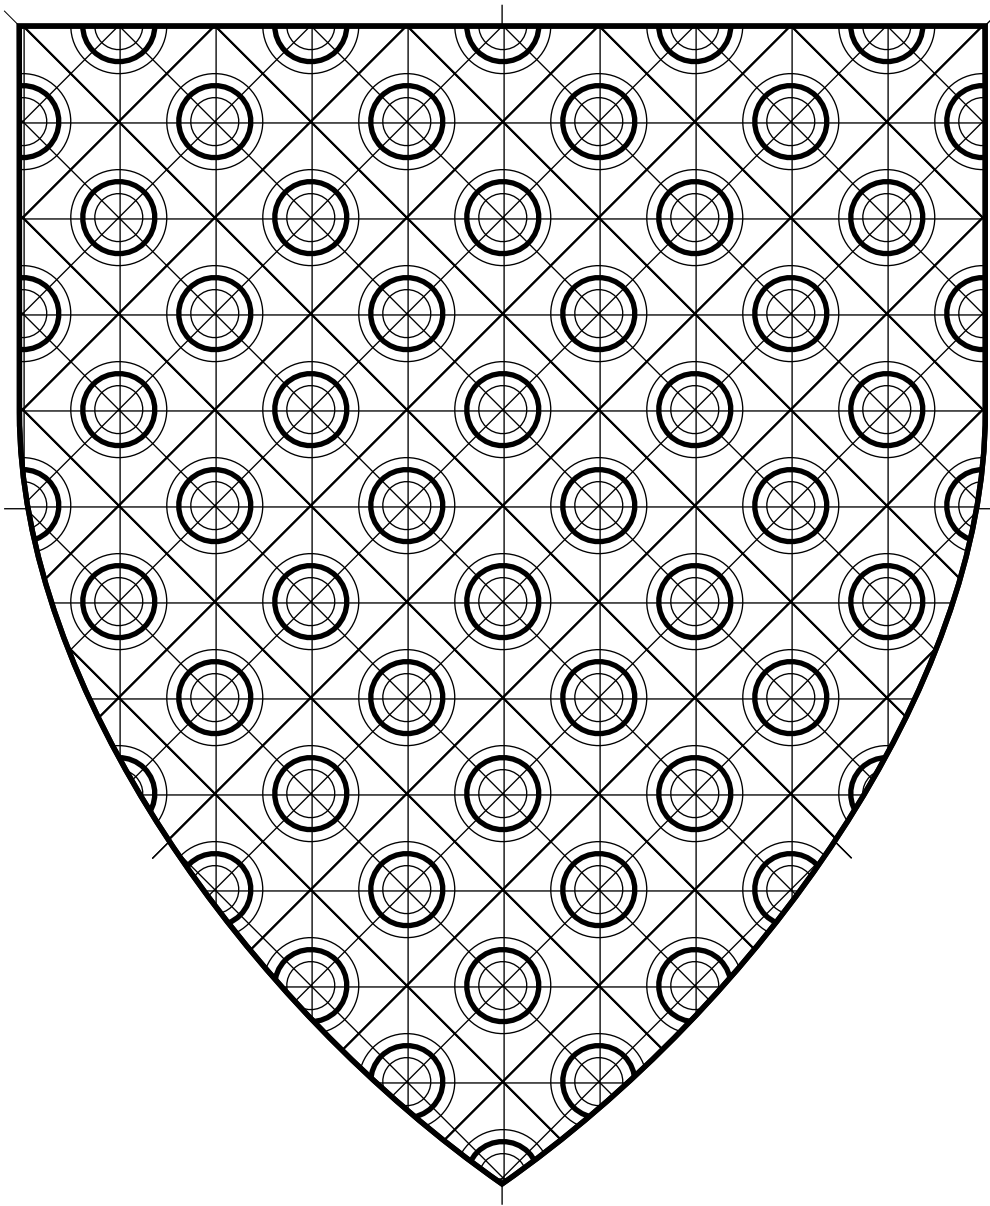

Semy of 9x9 • G.24

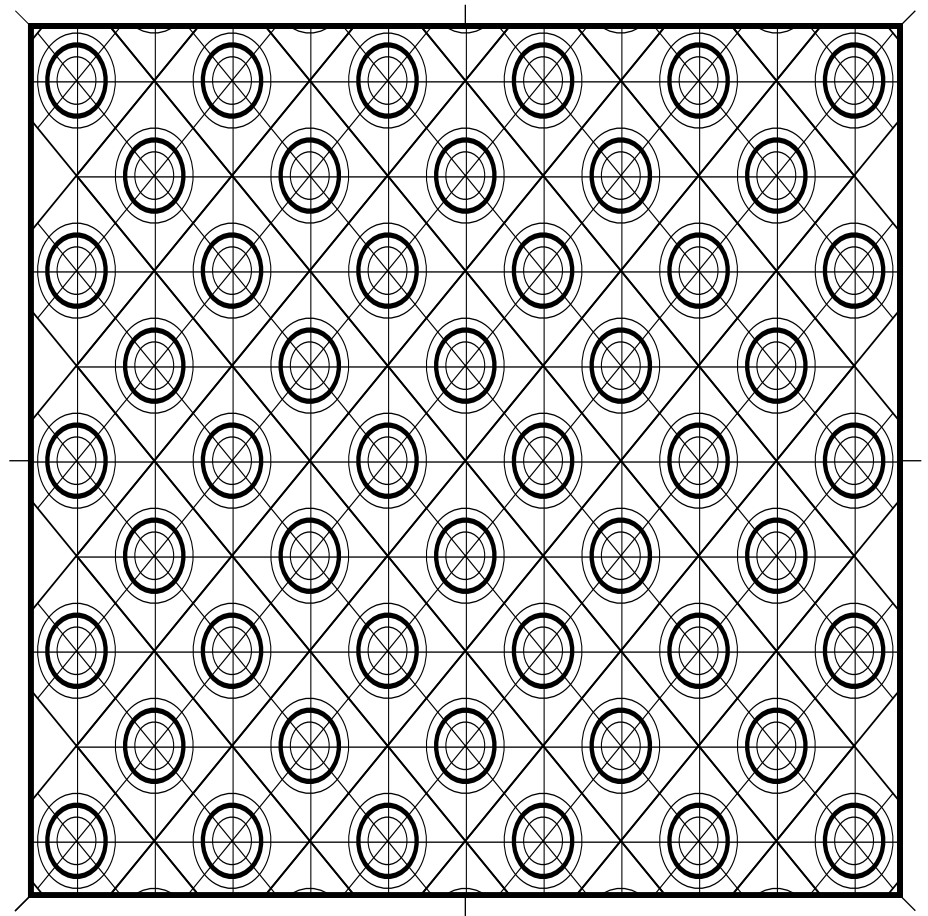

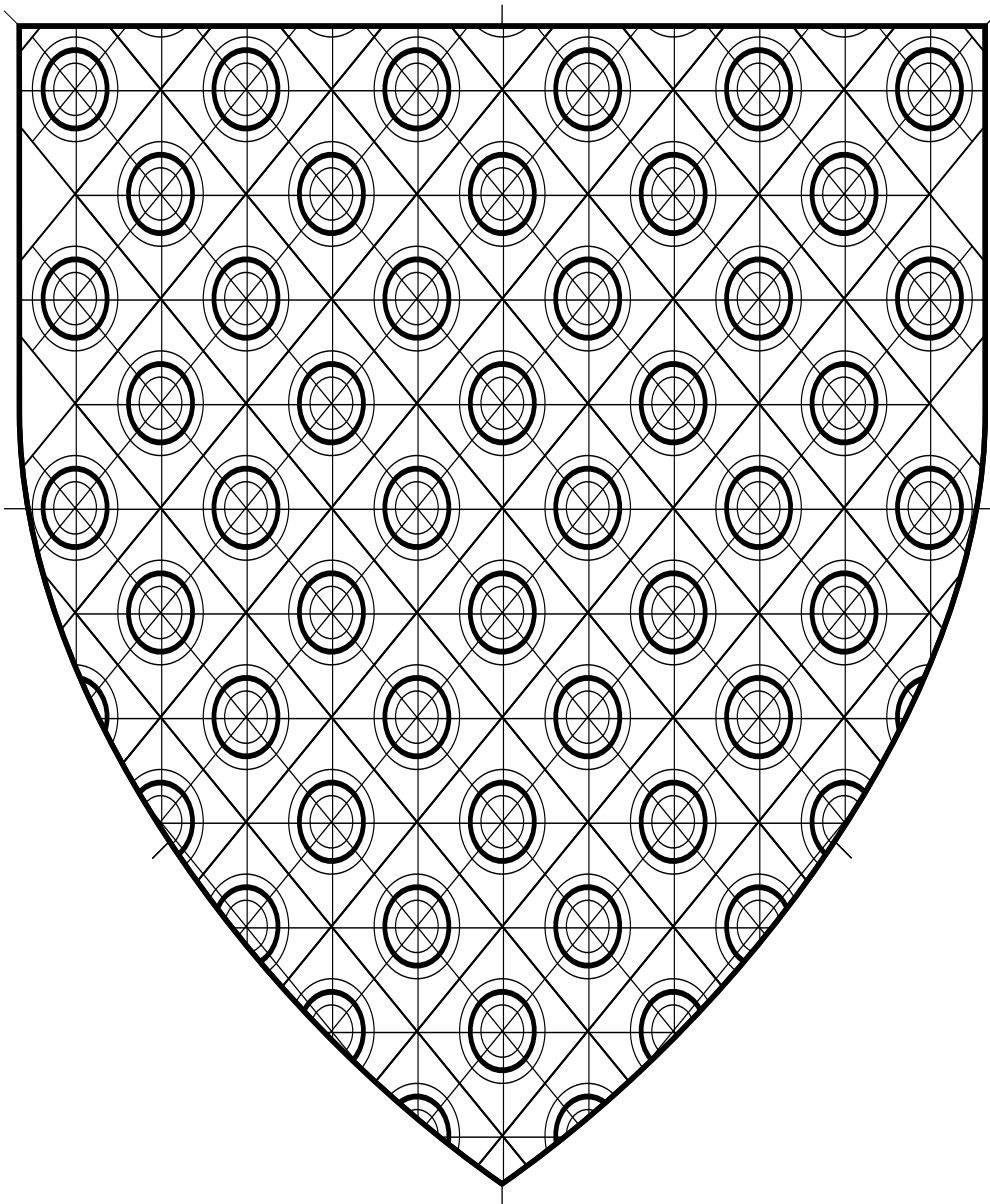

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

Semy of 10x10  G.25

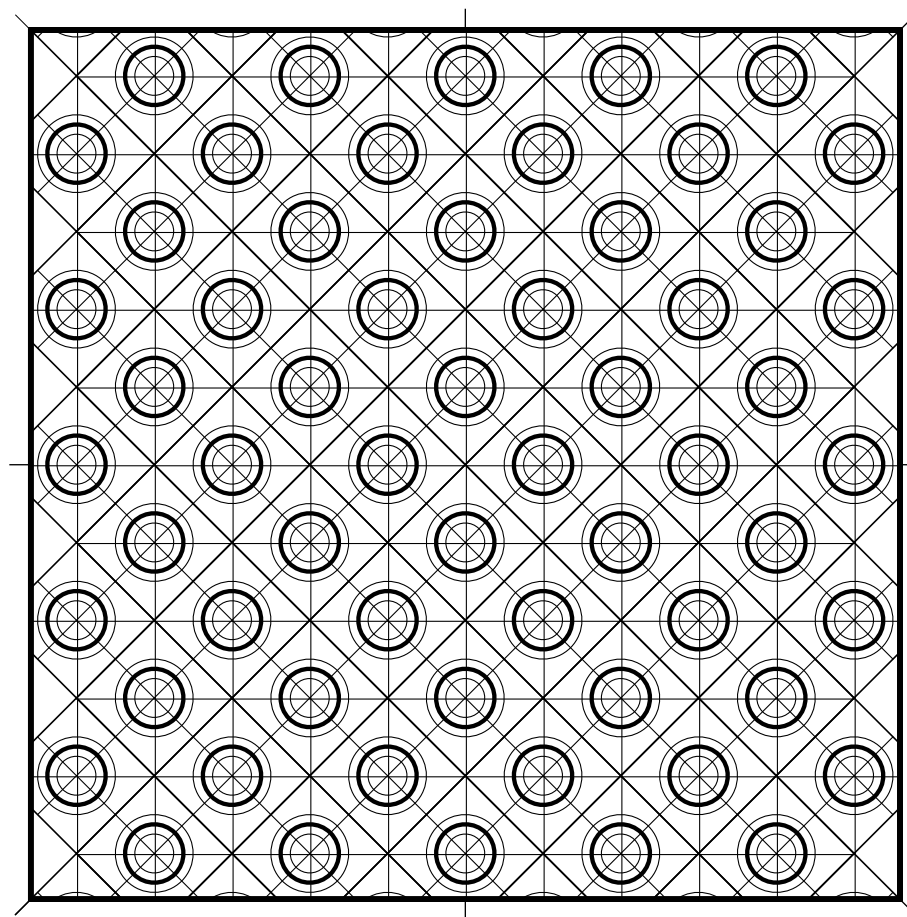

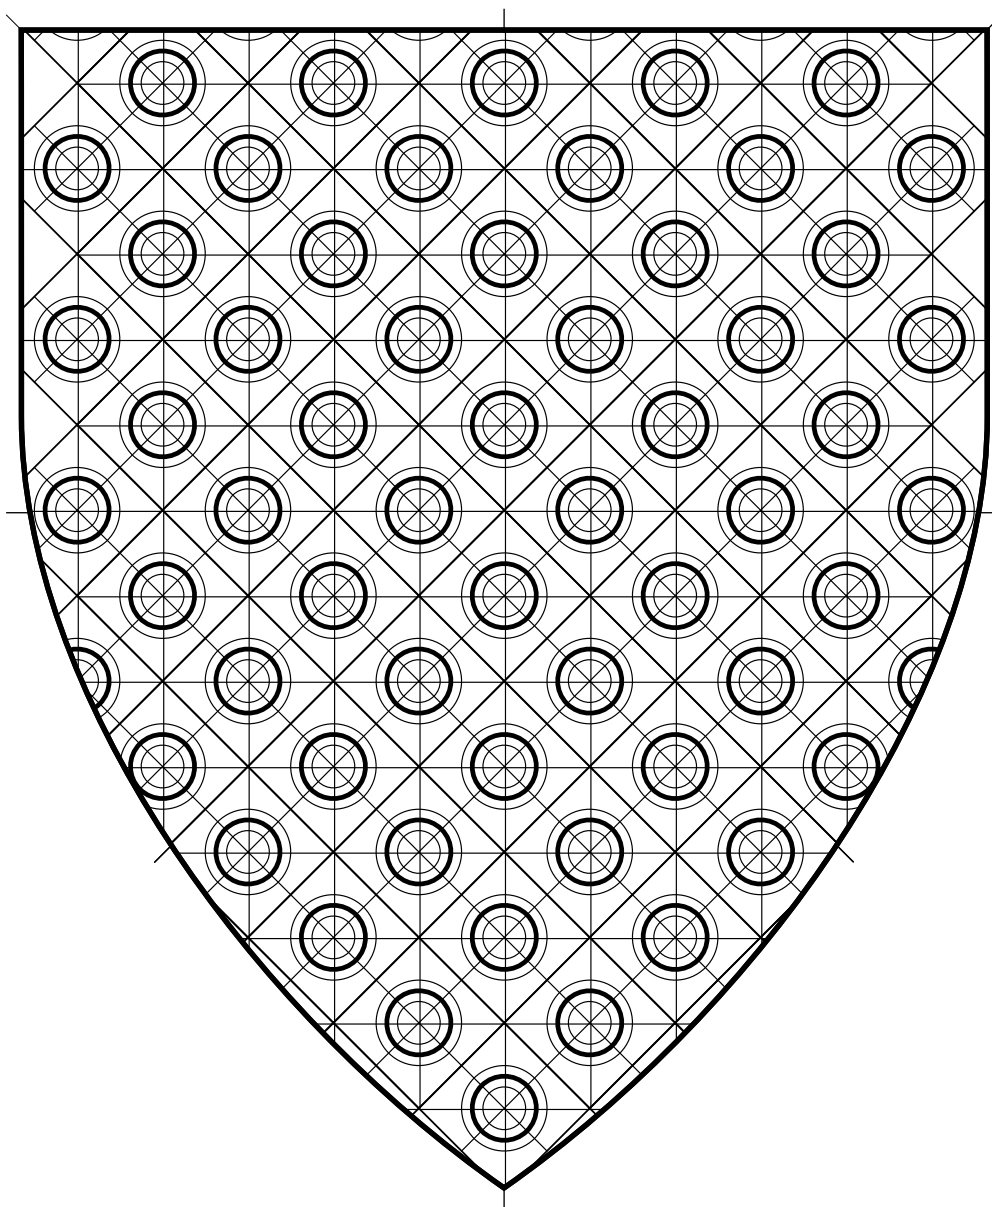

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

**Semy Cloth of 10x10 • G.26**

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

*Semy of 11x9* • **G.27**

For positioning of semys, the field here is tiled with lozenges a fraction of its width, with spaces for charges placed at alternating intersections.

*Semy of 11x11* • **G.28**
